The Wetsel Seed Company, Inc.

128 WEST MARKET STREET

HARRISONBURG

VIRGINIA

Avoid mistakes and misunderstandings by carefully observing these instructions:

We pay the postage on all vegetable and flower seeds except where otherwise specified. Field seeds and miscellaneous supplies are priced f.o.b. Harrisonburg, Va., but if desired by mail, add postage at the rate of 8 cents for the first pound, 1 cent for each additional pound. We guarantee safe delivery of the goods to your home.

If C.O.D. shipment is desired, one-fourth of the amount of the order must accompany the order. No plants will be shipped C. O. D.

Be sure to sign your name, post office, rural route and state on every order. Give the nearest express office if order is to be sent by express. Write plainly.

All Farmers and Gardeners of experience know that success with seeds depends largely on weather conditions and proper cultivation, so in accordance with the universal custom of the trade, THE WETSEL SEED CO., INC., gives no warranty, expressed or implied, as to the description quality, productiveness, or any other matter of any seeds, bulbs, plants, or roots they send out, and they will not be in any way responsible for the crop.

Dependable Farm Seeds

ALFALFA

Sow 15 to 20 lbs. to the acre in March or April.

PRICES SUBJECT TO CHANGE—MARKET FIRM

Preparation of Soil—Good loam or clay soil with natural or artificial drainage, with no hardpan underneath, will grow alfalfa when properly prepared, and proper and thorough preparation is a prime necessity for a uniform, heavy stand. Where the soil is acid, and that is the case in most instances, liming is necessary. Lime must be used to not only neutralize the acid in the soil, but leaves a surplus besides, for the use of the plant. For correcting of soil acidity, lime must be used at the rate of from 1 to 2½ tons per acre, after plowing. A firm seed bed is very essential and the land should be prepared sometime in advance of seeding. During this interval harrow the land frequently both ways to kill out all weeds. The young plants are not able to cope with weeds, but once established, are well able to care for themselves.

Inoculate Alfalfa—Each year we become more convinced that money spent in inoculating legume crops, and Alfalfa is no exception, pay big returns. We believe every dollar spent in this way will return five. What better investment could you make? An authority on inoculation of legume crops recently made the statement that every dollar spent in legume cultures was worth \$60.00

UTAH HIGHLAND ALFALFA

Preferred by many of the largest growers throughout the piedmont and mountain sections. Being grown in a more northern section is hardier than the Kansas or Oklahoma and a most dependable strain. Lb. 30 cts., Bu. \$17.00.

GENUINE KANSAS GROWN ALFALFA

The most popular strain in the East

It stands the severe winters of Kansas, and will come through our winters splendidly, rarely ever winter-killing. In a test of alfalfas from many sources made by the Virginia Agricultural Experiment Station, four plantings of Kansas alfalfa stood the winter better than any, and yielded more than 4½ tons per acre. It makes a quick spring growth and gives several cuttings each season. Lb. 29 cts., Bu. 16.50.

OKLAHOMA-KANSAS ALFALFA

For Virginia, Carolina and other Southern States, Oklahoma-Kansas is highly recommended. The senior agronomist of the United States Department of Agriculture in a letter recently says: "In the southern half of the United States, Oklahoma and Kansas alfalfa generally survive the winters satisfactorily, and under such conditions we have found no significant difference in yield." Lb. 28 cts., Bu. \$15.00.

GRIMM ALFALFA

In Sealed Bags

Grimm Alfalfa is the hardiest of all alfalfas and will stand the severest winters of our mountain sections. It has a deep branching root growth that gives the plant a firm hold on the soil and prevents heaving by frequent freezes and thaws, and also adapts it to shallower soils. If your soil has a hardpan near the surface or if your farm is in the mountain section, it will pay you to give Grimm the preference. Oklahoma Grimm, lb. 30 cts., \$16.50 bu. Kansas Grimm, lb. 32 cts., \$18.00 bu.

ARGENTINE ALFALFA

Found to be satisfactory for Virginia conditions, especially in mixtures. Lb. 22 cts., Bu. \$12.50.

CLOVERS

WHITE SWEET CLOVER

A Real Soil Builder

There is probably no crop that will improve soil fertility as fast as sweet clover if a reasonable stand and growth is obtained. Sweet clover will grow on any type of soil, provided it is well limed and inoculated, and like all other crops it responds readily and profitably to fertilizer and manure.

When sowing sweet clover in the spring some nurse crop should always be used, as it does not compete strongly with weeds, and when sown alone it is likely to be killed out. Any of the early small grains, such as oats or a fall-sown grain are the best nurse crops for sweet clover. Sow 15 to 20 lbs. per acre of Scarified or Hulled seed.

Yellow Sweet Clover responds to same treatment as White. Is not quite as tall and ten days earlier. White or Yellow lb. 10c.; Bu. \$5.00.

UNHULLED SWEET CLOVER

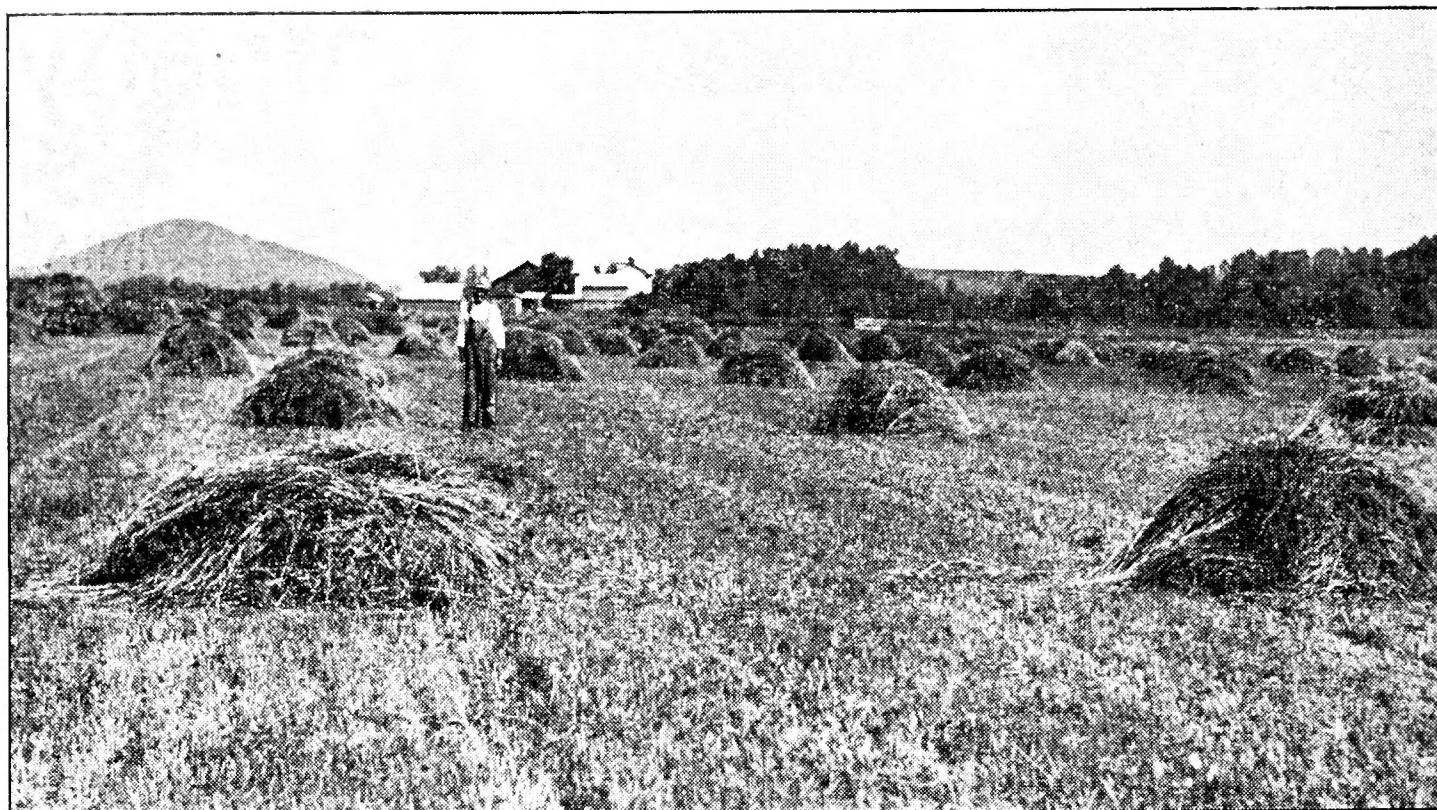

Sow in February and March at the rate of 20 to 25 lbs. to acre. By sowing the unhulled it gets an earlier start in the spring and is more likely to catch. Very popular in recent years. White or Yellow lb. 9c; Bu. \$4.75.

MAMMOTH OR SAPLING CLOVER

VIRGINIA GROWN

Mammoth or Sapling Clover is widely known and used very extensively, especially when clover is seeded with Timothy, and it is desired to cut for hay. Mammoth Clover being later than old time Red, matures much more evenly with Timothy. It makes a much more vigorous growth resulting in greater tonnage, per acre. Lb. 22 cts.; Bu. \$12.25.

Imported Sapling Clover lb. 18 cts.; bu. \$9.75.

Timothy Grown on C. R. Glover Farm

RED CLOVER

VIRGINIA GROWN

Red Clover, sometimes referred to as Old Time Red or Little Red Clover, needs no description with the average farmer. It has for many years been the leading clover in farm rotation. Matures early and produces a second crop, affording late pasture, a crop of seed, or if left on the ground is fine for improving soil. It produces a nitrogen needed in most soils, that is hard to obtain in any other way. Lb. 21c; Bu. \$11.75.

Imported Red Clover lb. 18 cts., bu. \$9.50.

ALSIKE CLOVER

Alsike Clover is being more widely used each year owing to the fact that it will grow on acid soil. Alsike is very hardy, frequently taking hold where other clover fails, especially in low, wet places, or on high gravel soil. Makes a very desirable hay for home feeding, and is a soil improver. In a bushel of Alsike there are 50 per cent more seeds than a bushel of other clover. 98 per cent Lb. 19c; Bu. \$10.50. 97 per cent Lb. 18c; Bu. \$9.75.

WHITE DUTCH CLOVER

FOR LAWNS AND PASTURES

Makes a small, close, compact growth, covering the ground like a carpet. Sow either in the spring or fall. When sown by itself, sow 5 to 6 pounds per acre; it is better, however, sown in mixture with other grasses. Lb. 45; 15 lbs. 44 cts. lb.

KENT COUNTY WILD WHITE CLOVER

This seed came from England. Different from all other white clovers. Excellent for grazing for beef cattle. Produces extremely thick root system, which provides its rare qualities as a pasture grass. . . Used with many of the ordinary grasses, helps them produce much better stands. \$1.25 per lb.

CRIMSON OR SCARLET

(Trifolium incarnatum)

The Great Nitrogen Gatherer. The best crop for hay, soilings and green manuring; Fall, Winter and Spring pasturing. Crimson Clover furnishes an abundance of nutritive forage at seasons when pastures are dead. Improves poor land, restores to fertility those that have been worn down by excessive cropping. May be planted in the Spring, Summer or Fall. Lb. 15c; Bu. \$8.40.

Warning About Lespedeza

Dodder or Love Vine, as well as Johnson Grass, are very serious pests to lespedeza and thrive to a greater extent in lespedeza than in any other crop. The general run of lespedeza grown in the East contains an excessive quantity of weed seeds, particularly of dodder, which can hardly be detected from general appearance. We have known many lots of farmers run seed to contain dodder from 25 to 100 per ounce; this we consider unfit for seeding purposes. We strongly suggest, unless securing your seed from reliable source, that a test be made for purity before buying.

Korean Lespedeza

This popular new type of Clover is coming into large demand. "Korean Lespedeza" makes the best and prettiest of hay, equal to Alfalfa in analysis and feed value. Grown 20-24 in. tall and very thick on good land, producing 2 to 3 tons of hay per acre

each year and reseeds itself if cut properly, even with closest grazing. It grows readily in acid soil. It requires no land preparation for sowing; does not cause slobber nor bloat when pastured. Korean makes the best and cheapest midsummer pasture from June through September, is drought resistant and is cut for hay in August when least likely to be lost from wet weather. It may be put in the barn 36 hours after cutting. It permits use of land for small grain crops, increases soil fertility and costs less to set and keep a stand than other important legumes. Sow on small grain from February 1st to April 15th, 20 pounds per acre. Does well in most all pasture mixtures.

Dodder Free Seed Lb. 6c; 100 lbs. \$5.25

2 Dodder Per oz Lb. 6c; 100 lbs. \$5.00.

Lespedeza Sericea

Perennial

Adapted to Every Soil Type

Adapted to any type of soil, wonderfully resistant to drought, large yielding hay crops, good pasture, and a fine soil improver.

Like alfalfa, it requires one year to get set, but after the first year it will produce two to four tons of field-cured hay per acre annually. Actual feeding trials have proved that Lespedeza Sericea hay is equal to that of alfalfa. Sow unhulled seed in February and March 20 to 25 lbs. per acre. Hulled or Scarified in April or May 15 lbs. per acre. Can be sown under same conditions as Korean.

Hulled Seed Lb. 16c; 100 lbs. \$15.00. Unhulled Seed Lb. 13c; 100 lbs. \$11.50.

Hairy Vetch

(Vicia Villosa)

It is very hardy, is valuable as a Winter cover crop to prevent leaching, and for forage and fertilizing purposes. Used in Spring also with oats for hay. 15 lbs. Vetch and 1½ Bu. Oats per acre makes good mixture. Lb. 11c; Bu. \$5.75.

Domestic Rye

Excellent for winter lawns. Ideal for sowing on crab-grass sod when the crab grass becomes dormant. If well watered, seed will germinate in 6 to 8 days. Domestic Rye should be sown each fall. Keep closely clipped in spring. Lb. 15c; 25 lbs. 12c. per lb.

GRASSES

TALL MEADOW OAT GRASS

Especially adapted to the South; stands heat and drought of mid-summer and the cold of winter. Starts growth early in spring and gives good grazing until late fall. If sown alone, use 18 to 22 lbs. per acre; if sown in mixture use 8 lbs. of Tall Meadow, 8 lbs. of Orchard Grass, 8 lbs. of Red Clover. Lb. 14 cts; 100 lbs. \$13.00.

ROUGH-STALKED MEADOW GRASS

Desirable for shady spots, for pasture use, and for lawns. Purity 85 per cent. Lb. 50c.; 5 lbs. \$2.25.

SUDAN GRASS

A great summer forage crop. Sow about 10 lbs. per acre in drills 18 in. apart and cultivate; may be broadcast at the rate of 20 to 25 lbs. per acre. Ask for prices.

CHEWING' FESCUE

Dark green leaves; forms dense turf. Permanent in most places and good in shade. Purity 85 per cent. Lb. 75 cts.

RED TOP, OR HERD GRASS

Succeeds better and is adapted to a wider range of soils than any other grass grown in the United States. Red Top is especially adapted for growing on wet, heavy bottom lands, and should always be included in mixtures for such lands whether for hay or pasture. Red Top, if sown alone, should be seeded at the rate of 8 to 10 pounds per acre of fancy recleaned seed. Being used quite a bit in recent years with Timothy. Lb. 14c; 25 lbs. 13c lb.

TIMOTHY

Timothy is suitable for a wide variety of soils, but does best on bottom lands, rich moist loams and clays. It does not do so well on light sandy soils. Timothy can be sown to good advantage in either fall or spring. Sapling Clover, 6 lbs.; Timothy, 8 lbs., and Herds Grass, 6 lbs., make a mixture very desirable for hay or pasture, sufficient to seed an acre. Timothy by itself requires to be sown at the rate of about a peck to the acre or with clover 6 lbs., of Timothy and 6 lbs., Sapling Clover will give a good seeding. 99.60 pure. Lb. 6c; Bu. \$2.25.

KENTUCKY BLUE GRASS

Does not succeed on thin sandy soils. Limestone and stiff soils suit it best. One of the first grasses to start up in the spring, yielding valuable nutritious pasture. It stands the coldest weather and cattle trampling the ground does not injure it. Should be sown thickly, as it requires some time to become thoroughly established, usually one or two years, and for that reason we recommend that it be sown with other grasses. Sow either in the fall or spring, 15 to 20 lbs. to the acre. Lb. 20c; Bu. \$1.85; 8 Bu. Bag \$1.80 per bu.

ORCHARD GRASS

Orchard grass is a very vigorous grower and yields large crops of excellent and nutritious hay, as well as having special value as a pasture grass, furnishing good grazing from early spring till winter. It responds quickly after cutting or grazing, for in a few weeks of seasonable weather it is ready for grazing again. When cut for hay be sure to cut when in bloom, or as soon thereafter as possible, for if left too long after blooming the woody fibre forms and the hay becomes coarse. Orchard grass is particularly well adapted for pastures, and has the further advantage of growing well in shade, giving excellent results when sown in orchards and shaded parks. Virginia Seed 83.00 Pure. Lb. 18c; Bu. \$2.45. Virginia Seed 80.00 Pure Lb. 17c.; Bu. \$2.25.

PASTURE MIXTURE

We recommend this mixture for most types of soil. 7 lbs. Korean Lespedeza, 7 lbs. Orchard Grass, 3 lbs. Red Top, 2 lbs. Alsike Clover. Approximate cost \$2.38 per acre. Sow in February and March on small grain or old sod.

LADINO CLOVER

Italian Seed Keeps More Cows In Clover

AMHERST, Mass., Jan. 28 (U.P.)—Ladino clover, imported from Italy is increasing profits of Massachusetts dairymen, according to Ralph W. Donaldson, Massachusetts State College soils specialist.

This succulent crop grows so thick and fast, he says, that "12 cows get abundant feed where one cow starved before."

Ladino seeds first were brought into Massachusetts in 1928 by John Ellis. His first crop was so successful that neighboring dairymen experimented. Since then plantings have increased each season, and last year 1200 acres were devoted to this crop cultivation.

LADINO CLOVER BETTER PASTURE THAN HAY CROP. Sow from 1 to 3 lbs. per acre, in grass mixture. Price \$1.25 per lb. Ask for circular on Ladino Clover.

Seed Oats

Columbia Spring Oats. The earliest maturing and heaviest yielding spring oat. A selection from Fulghum. Seven to ten days earlier, more uniform, taller, more erect, larger heads, heavier, plumper grain, and can be planted a week later and still mature before hot weather and rust damage. It yields 79 bushels per acre while other spring planted oats yielded 40 to 55 bushels. Large, heavy, well-filled heads, reddish gray color, awnless. Already the leading spring oat in the Mississippi Valley. Bu. 70 cts; 10 bu. 68 cts. per bu.

Fulghum. Rust-proof. Earlier than Appler or Bancroft; one of the best early varieties for spring planting in Virginia. Heavy yielder. Bu. 70 cts, 10 bu. 68 cts. per bu.

Albertas. Extra large and heavy oat. 45 pounds to the bushel. Grown in extreme north. Bu. 90 cts; 10 bu. 88 cts per bu.

Swedish Select. Highly recommended for Virginia and West Virginia, making good crops on light and heavy soils. Grain plump, extra heavy. Bu. 65 cts., 10 bu. 63 cts. per bu.

Kasco. Swedish type but not quite as plump as the Swedish select. Recommended where a cheaper oats is desired. Bu. 60 cts., 10 bu. 58 cts. per bu.

Can supply all varieties of oats treated with Ceresan at 5 cts. per bushel extra. We strongly suggest that you sow treated grains

Rape Seed

Dwarf Essex. Highly recommended for cattle, sheep, hogs and poultry. Sow seed in early spring, 3 to 5 lbs. per acre in drills, or 8 to 10 lbs. broadcast. Lb. 10 cts., 25 lbs. 9 cts., per lb. 50 lbs. 8 cts. per lb.

SUGAR CANE

Sugar Drip. Large, juicy growth, yielding about 65 per cent of total weight in juice. Adapted to Virginia. Lb. 15 cts., 5 lbs. 60 cts.

Early Orange. Excellent for sorghum and forage. Lb. 15 cts., 5 lbs. 60 cts.

COWPEAS

A highly nutritious forage crop and valuable for soil-improvement. For the latter use, cut the vines for forage or hay, then sow seed in the stubble and roots. Vines produce an immense quantity of feed in a short time. Sow 1½ bus. per acre between May 20 and July 15.

Mixed Cowpeas. A mixture produces a better crop of vines and foliage than a single variety. For soil-improvement, the mixture has distinct advantages. A bushel of Peas and 6 lbs. of Millet per acre makes a fine hay crop. Bu. \$2.35, 5 bus. \$2.30 per bus.

PEAS FOR TABLE USE

Large Early Black Eye. Long pods; pure white peas with black eyes. Lb. 15 cts., 10 lbs. 12 cts. per lb.

Early Small Black Eye. Excellent quality. Lb. 15 cts., 10 lbs. 12 cts. per lb.

Crowder. Seeds light brown, large, irregular shaped. Lb. 15 cts., 10 lbs. 12 cts. per lb.

BROOM CORN

Will grow on any land that is adapted to Corn. Plant in drills 1 to 1½ inches deep, when the ground is thoroughly warm, in 3½ foot rows, thinning out 6 to 9 inches in the row. Plant 6 pounds per acre.

Standard Evergreen. Grows to a height of 8 to 10 feet. Yields a heavy brush, free from heavy center stems and crooked brush. Ready to cut 90 to 100 days. Lb. 20 cts; 5 lbs. 75 cts.,—not postpaid.

SOY BEANS

For hay crop, broadcast 1½ bus. per acre; for seed use 1 bu. per acre. Sow in late May or early June. If a crust forms on the surface of the land before the Soy Beans come up, break it with a harrow, thus preventing "breaking their necks."

Virginia. 125 days. Makes excellent hay and ensilage. Can be grown throughout the Corn Belt. Vines make fine growth of well-filled pods. Easy to cut and cure. Bus. \$1.40, 10 bus. \$1.35 per bu.

Wilson Early Black. 120 days. Early-maturing variety. Stands up well, holds pods above the ground, and stems cure quickly. Bu. \$1.30, 10 bu. \$1.25 per bu.

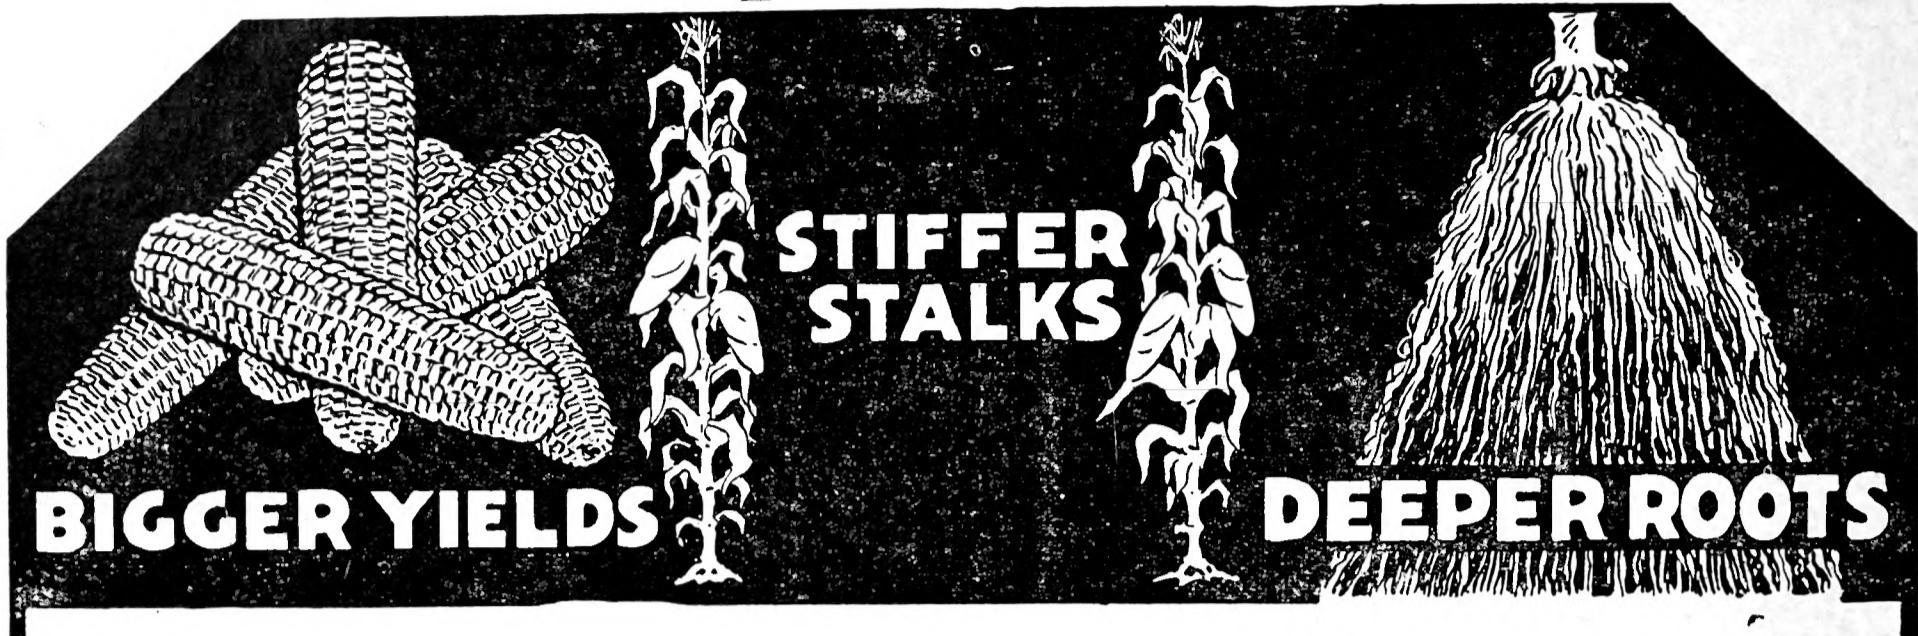

Tar Heel Black. 140 days. Upright vines well filled with pods. Grows 3½ to 4 ft. high, branching close to ground, with thick stalk and abundant foliage. Bu. \$1.30, 10 bus. \$1.25 per bu.

Tokio. 145 days. Heavy yielder of hay and seed. Vines thrifty, upright in growth, and easily cut. Bu. \$1.35, 10 bus. \$1.30 per bu.

Prices on Peas and Beans include Bags and subject to market changes.

All prices on Field Seeds are subject to change without notice and F. O. B. Harrisonburg except where otherwise noted. If ordered by mail add 10c for first pound and 1c extra for each additional pound. Bags included on all items except Clovers and Timothy.

Wetsel's Dependable Seed Corn

and Greater Profits with Hybrid Corn

Hand Selected, Graded, Tested and Treated. Bags Included.

WHY USE CERTIFIED SEED CORN?

As members of the Virginia Crop Improvement Association, we recommend Certified Seed Corn. Stock of known merit are obtained, carefully isolated, and selections made by experienced growers. In September the fields are inspected for purity; the storage and drying equipment is also inspected. In January the stock in storage is inspected and samples taken for germination and mixture. Corn passing these tests will be shelled, graded and samples tested for germination. Seed passing all these tests is then sold as Certified Corn.

The additional cost of about 6c an acre to plant Certified strains will pay you back many times in dollars at harvest time.

Reid's Yellow Dent. (Certified.) Grown by Mr. Ward, Champion Corn-grower of Virginia. Use Certified seed and be sure of a good crop, even under adverse conditions. The most popular Yellow Corn on the market. Pk. 85 cts., bu. \$3.00.

Reid's Yellow Dent. Grown from Certified Seed one year removed. Graded and tested. Pk. 60 cts. Bu. \$2.25.

Boone County White Dent. (Certified.) Matures in 125 days; 9 feet tall. Has won most of the important prizes for White corn in Virginia corn shows for thirty years. It has magnificent heavy ears 10 to 11 inches long, with 18 to 20 straight rows of deep grain closely wedged on a white cob. One of the heaviest yielding corns on good soils in the Piedmont and Valley sections. Pk. 75 cts.; Bu. \$2.75.

Boone County White Dent. We can also supply Boone County White grown from Certified Seed. One year removed. Pk. 60 cts. Bu. \$2.25.

Golden Queen. (Certified.) 110 days. Extensively grown in Maryland and southern Pennsylvania, and becoming popular in Virginia on account of its good qualities. Ears medium size with deep grains. Fine yielder on good soil and a reliable producer on thin soils. Gal. 45 cts., pk. 80 cts., bu. \$3.00.

Bloody Butcher. 100 to 110 days. Stalks about 9 ft. high with big ears of red and yellow grains. Desirable for silage or feeding. Gal. 30 cts., pk. 50 cts., bu. \$1.85.

Early Massodent. Often known as White Cap. Large ears with deep grains, pale yellow on cob but rich yellow when shelled. Gal. 30 cts., pk. 50 cts., bu. \$1.85.

Extra-Early Clarge. Seed produced in central Ohio. Ear reasonably large, with rich golden grains. Should yield a satisfactory crop of good hard Corn. Gal. 35 cts., pk. 55 cts., bu. \$2.00.

Golden Queen. (Not Certified.) Gal. 30 cts., pk. 55 cts. bu. \$2.00.

Pride of the North. 90 to 100 days. Ears 7 to 8 ins. long, carrying 12 to 14 rows of yellow grains. Gal. 30 cts. pk. 55 cts., bu. \$2.00.

"Lancaster or Penn Sure Crop". This great corn has won for itself more friends—has more users through Eastern United States—than any other corn! No other corn has brought in nearly so many fine reports from its users. There must be reasons for such great popularity. And there are! It is a money-making, truly sure-cropping corn. Produces good large ears of hard corn—lots of them—mighty few nubbins. Fills the crib, and fills the silo. Pk. 50 cts.; Bu. \$1.85.

Wetsel's Seed Corn Treated with Semesan Jr. - Free

Much seed corn becomes infected with some disease organism before or after planting. The result is a poor stand, weak plants, mouldy ears, and reduced yield. We treat all our seed corn with Semesan Jr., without cost to you. The treatment permits earlier planting, increases germination, protects from blight, root-rot, and other diseases makes better plants, and should increase the yield from 4 to 20 bushels an acre.

IOWEALTH HYBRID

IOWEALTH NO. 53. This is a big eared, utility type hybrid in the southern corn belt class. Ears are of high quality and very disease resistant, carried rather low on the stalk. This makes it ideal for bottom land where ears are likely to run too high, but Iowalth 52 and 25 are preferable on up-land. Ears are 12 inches long and 18 to 20 rowed, bright yellow in color.

IOWEALTH NO. 52. For maximum grain yields on almost any soil type in the southern corn belt zone you will find it hard to equal this number. It often produces two good-sized ears per plant and for this reason can be cribbed earlier in the fall than most hybrids of this maturity. The ears are medium smooth and very disease resistant. This is the most productive new number recently introduced. It stands well and has less ear worm damage than most other strains. Gal. 90 cts., Pk. \$1.80; bu. \$7.00. Not postpaid. Gal. \$1.05; Pk. \$2.05; 1/2bu. \$3.95, bu. \$7.70. By mail Postpaid.

Wood's Hybrid Early Yellow Dent

Highest Yielding Yellow Corn for Middle Atlantic States

Matures in 112 days; roasting ears in 85 days. A cross between Reid's Yellow Dent and Lancaster Surecrop inbreds with the same wide adaption. For three years it made the highest average yield of any yellow corn in Piedmont and Mountain Virginia Experiment Stations, outyielding 27 white and yellow corns at Chatham, Va. Other tests indicate it is the best yellow corn for Western North Carolina, Kentucky, lower altitudes of West Virginia Maryland, Southern Pennsylvania, Delaware and New Jersey. Heaviest yielding early feed corn farther south. It should be planted a fourth closer in the row. Short, stocky stalk each bearing a large, sound, beautiful ear 11 inches long.

"I planted two hybrid corns from different seedsmen and found Wood's most adaptable, disease-resistant and strongest roots. It is storm-resistant and yields well above all other corns. I have placed my order with you for myself and neighbors."—G. D. Dutrow, Frederick County, Maryland.

"My regular corn was washed down by heavy rains and didn't do anything. Wood's Hybrid Yellow Dent came through and made a good yield. It had the best stalk I ever saw. I am planting my entire crop in it next year."—I. W. Hayes, Lenoir County, N. C.

Gal. 80 cts., pk. \$1.60, 1/2 bu. \$3.00, bu. \$6.00, 5 bus. lots \$5.75—not postpaid—F.O.B.—Harrisonburg

Gal. \$1.00, pk. \$1.90, 1/2 bu. \$3.45, bu. \$6.75.—by mail postpaid.

Ensilage Corn

Grown on James River

Blue Ridge. Matures early and is popular in this section. The grain is the largest of any ensilage variety. Gal. 30 cts., pk. 60 cts., bus. \$2.25.

Eureka. A first-class Ensilage Corn and a good Field Corn. Stalks 12 to 15 ft. high. Gal. 30 cts., uk. 55 cts. bu. \$2.00. \$2.00.

Old Virginia. Broad, thick, succulent fodder. Deep grain, easy to husk. Bu. \$2.00; 5 bu. \$1.95 per bu.

Pamunkey. Extra-heavy producer. Strong, vigorous growth, 13 to 15 ft. high. Stalks usually bear 2 large ears. Gal. 30 cts., pk. 60 cts., bu. \$2.25.

Wetsel's Dependable Vegetable Seeds

Asparagus

Make the soil very rich. Soak the seed 24 hours before planting. Sow in early spring or fall. When plants are well developed, transplant to rows 2 ft. apart, with plants about 15 ins. apart. Cultivate well.

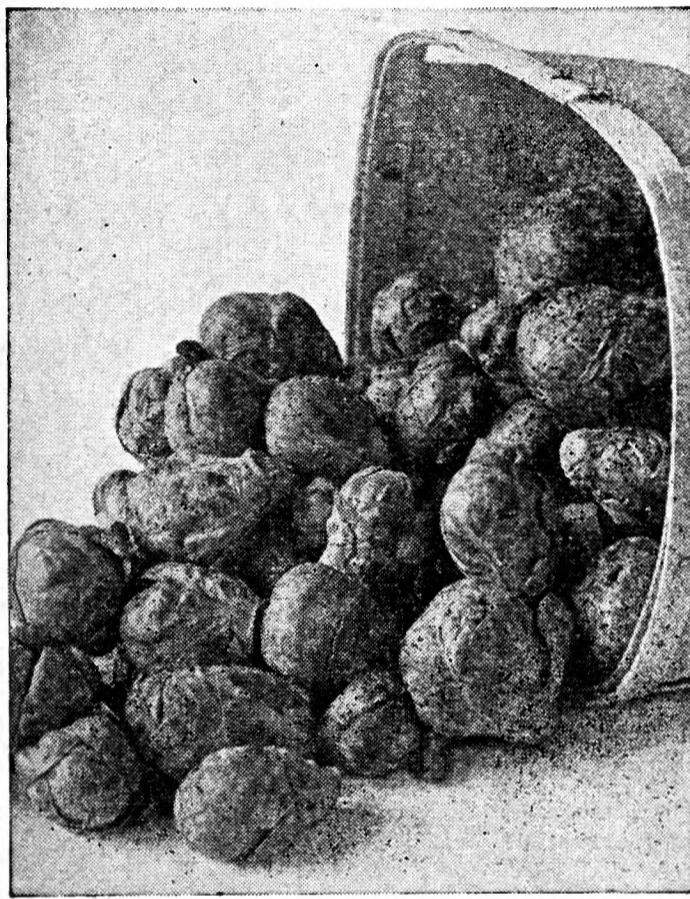

Mary Washington. Rust-resistant. Large straight stalks with firm delicious tips. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts. —postpaid.

Mary Washington Roots. Set in February and March. 1 to 3 yrs. old, 25 cts., per doz. 25 for 50 cts., \$1.25 per 100—not postpaid.

Broccoli

Italian Green Sprouting. Sprouts about 5 ins. long carry a head of green shoots. New heads form in 6 to 8 weeks after cutting. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.40—postpaid.

Brussels Sprouts

Brussels Sprouts

Long Island Improved. Small shoots, clustered around the main stem, mature in autumn. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 50 cts., \$1.75—postpaid.

BEANS

Dwarf or Bush Green-podded

For a continuous supply, plant every two weeks from April to August. Sow from $1\frac{1}{2}$ to 2 ins. deep, in rows 2 ft. apart. Cultivate frequently until blooming time, but never when plants are wet.

Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 70 cts., 10 lbs. \$1.35
Not Postpaid

Ask for prices on large quantities

Bountiful. 51 days. A first-early variety which continues to bear over a long season. Young pods entirely free from strings.

Burpee's Stringless Green-Pods. 54 days. Pods round, fleshy, stringless, and nearly straight. Heavy yielder.

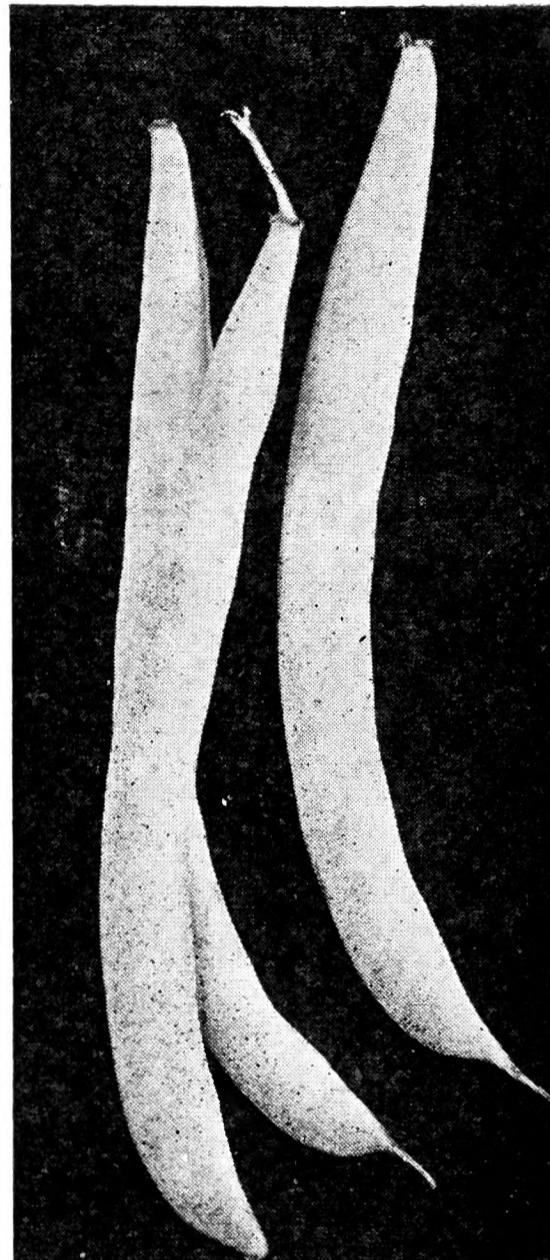

Dixie White. 52 days. Pods 4 ins. long, light green, round, straight and stringless when young. Excellent as a dry Shell Bean. Wonderful yielder.

Dwarf Horticultural. 58 days. Pods yellowish green, splashed carmine, slightly curved, 5 ins. long. Use as a Snap or as a Green Shell Bean.

Giant Stringless Green-Pod. 54 days. Excellent for market gardeners, shippers, and canners. Pods round, 6 ins. long, entirely stringless.

Red Valentine. 56 days. A standard early variety. Pods green, round, 5 ins. long, not entirely stringless.

Roger's Stringless Refugee. 68 days. Young pods valuable for canning and baking. Pods medium green, stringless, fleshy, and brittle.

Kentucky Wonder Wax Bean

TENDERGREEN STRINGLESS. 56 days. Excellent for home and market garden use. Pods fleshy, stringless, with many brown seeds which are mottled with light fawn. Plants strong, upright in habit, and yield freely.

Tennessee Green-Pod (Caseknife). 52 days. Pods the largest, longest, and broadest of any green-pod Bean, not entirely stringless.

Dwarf or Bush, Wax Podded

Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 85 cts., 10 lbs. \$1.50
unless otherwise noted—not postpaid

Davis White Wax. 57 days. Pods 5 to 6 ins. long, flat, wide, yellow, of good quality. Good for home use or shipping.

Pencil-Pod Black Wax 59 days. Pods 6 to 7 ins. long, straight round, absolutely stringless. Seeds black.

Rustless Golden Wax. 54 days. Disease-resistant. Pods golden yellow, about 5 ins. long.

Bush Shell Beans

Used exclusively as Shell Beans

Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 75 cts., 10 lbs. \$1.40,
unless otherwise noted—not postpaid

White Kidney. Kidney-shaped white seed.

Red Kidney. Seeds are brick-red in color.

White Navy. Most popular variety for baking. Plants heavy yielders. Lb. 15 cts., 2 lbs. 25 cts., 5 lbs. 60 cts., 10 lbs. \$1.10
—Not postpaid.

Bush Lima Beans

Plant 3 seeds in hills 15 ins. apart and rows 3 ft. apart. Cultivate the plants freely.

We do not prepay postage on Bush Limas

Burpee's Improved Bush. 75 days. Produces large pods which contain 4 or more thick Beans. The dry Beans are flat, greenish white. Lb. 25 cts., 2 lbs. 45 cts., 5 lbs. \$1.00, 10 lbs. \$1.80.

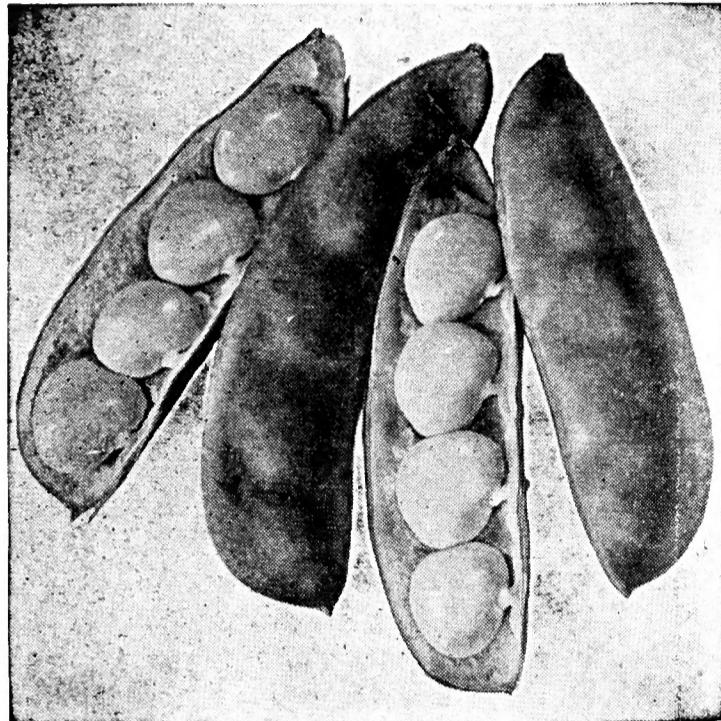

Fordhook Bush Lima. 75 days. Pods contain 3 or 4 seeds. Both the green Shell and the Dry Beans are large and plump. Lb. 25 cts., 2 lbs. 45 cts., 5 lbs. \$1.00, 10 lbs. \$1.90.

Henderson's Bush (Baby Lima). 65 days. A popular canning variety. Pods contain 3 or 4 seeds. Dry Beans are white. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts., 10 lbs. \$1.50.

Jackson's Wonder Bush. Medium-sized pods holding 4 or 5 thick Beans of good quality. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts. 10 lbs. \$1.50.

McCREA'S LIMA. 75 days. A strong, bushy plant with a big root-system. The pods resemble a Baby Lima, but the Beans are large and thick, retaining a green tint when cooked. An ideal home garden Lima with 3 to 4 beans in a pod. Lb. 30 cts., 2 lbs. 50 cts., 5 lbs. \$1.10, 10 lbs. \$2.10.

Pole Lima Beans

McCrea's Lima Bean

Plant when the ground is warm, in rich soil. Cultivate often, but never when the vines are wet.

We do not prepay postage on Pole Limas

Early Leviathan. 83 days. Long pods in clusters on the tall, strong vine; the white Beans are large and fill the pod. Lb. 25 cts., 2 lbs. 45 cts., 5 lbs. 90 cts., 10 lbs. \$1.60.

KING OF THE GARDEN. 85 days. An improved strain of the large white Pole Lima. Pods 5 to 6 ins. long, containing 4 or 5 large Beans of good quality. Lb. 25 cts., 2 lbs. 45 cts., 5 lbs. 90 cts., 10 lbs. \$1.60.

Sieva or Carolina. 75 days. Popular Pole Butter Bean. Early, prolific, and of excellent quality. Pods 3 ins. long. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 85 cts., 10 lbs. \$1.50.

Pole or Cornfield

Pole Beans are sensitive to cold, and should not be planted until the ground is warm. Use poles 6 to 8 ft. long, set firmly 3 ft. apart in rows 4 ft. apart. The Beans may also be planted with corn.

Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 70 cts., 10 lbs. \$1.30, unless otherwise noted—not postpaid

Creaseback, Striped. 70 days. Medium green, round pods, 6 ins. long, not stringless but of good quality.

Creaseback, White. 68 days. Bright green, round pods, about 6 ins. long, not stringless.

Golden Cluster Wax. 70 days. A late variety with flat yellow pods about 8 ins. long. Seeds white. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts., 10 lbs. \$1.50—not postpaid.

Ideal Black Pole. 58 days. Extremely early and prolific. Pods 5 ins. long, round, slightly curved, stringless, of excellent quality, borne in clusters of 6.

Kentucky Wonder Wax. 70 days. Flat yellow, stringless pods. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts., 10 lbs. \$1.50—not postpaid.

Kentucky Wonder, Brown-seeded. 65 days. A profusion of round meaty pods, often 9 to 10 ins. long. Very popular.

Kentucky Wonder, White-seeded. 62 days. Long, brittle, stringless pods, finely flavored.

Lazy Wife. 70 days. A late sort for home-gardens. May be used as a Snap, a Green Shell, or a Dry Shell Bean. Pods flat, about 5 ins. long. Dry seed is white.

London Horticultural. Short, straight, stringless pods. Dried Beans are fine for winter use.

McCaslan. 65 days. Green pods 8 to 9 ins. long, slightly flattened. White seeds. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts., 10 lbs. \$1.50—not postpaid.

Noxall (Missouri Wonder). 66 days. Long, round green pods. Good for Snap or Shell Beans. Gives large crops, and excellent for planting among corn. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts., 10 lbs. \$1.50—not postpaid.

Red Speckled Cut-Short (Corn Hill). 74 days. Long, straight, 4 in. pods, thick and crisp when young. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts., 10 lbs. \$1.50—not postpaid.

Tennessee Wonder. 71 days. Similar to Kentucky Wonder, but has larger, straighter, and smoother pods. More desirable as a Shell Bean than as a Snap. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts., 10 lbs. \$1.50—not postpaid

Table Beets

Beets grow best in sandy loam. Sow seed in early spring, in rows 1 ft. apart; when plants are about 2 ins. high, thin to 3 ins. apart. For winter use, sow from July to mid-August. 1 oz. of seed will sow 100 ft. of drill; 6 to 8 lbs. an acre.

Pkt. 5 cts., oz. 10 cts., 1/4 lb. 25 cts., lb. 70 cts.—postpaid

Crimson Globe. 65 days. Globe-shaped; deep crimson. Second early.

Crosby's Egyptian. 50 days. Early. Flattened globe-shaped; medium dark red; tops medium size.

Detroit Dark Red. 55 days. Main-crop variety. Roots round, smooth, deep blood-red. Very popular.

Early Blood Turnip. 60 days. Second early. Turnip-shaped; long tap-root. Used both for early and main crop; desirable for winter use.

Early Eclipse. 55 days. Root globular; flesh bright red, marked with white.

White Sugar. 90 days. Large. Excellent for table use or for stock. Heavy yielder.

Mangel-Wurzel or Stock Beets

Sow from April to July, in drills 2 ft. apart, thinning to 10 ins. apart. Sow 6 to 8 lbs. of seed per acre.

Pkt. 5 cts., oz. 10 cts., 1/4 lb. 20 cts., lb. 50 cts.—postpaid

Golden Tankard. Flesh yellow and inclined to color the milk. Large root, usually larger at the bottom than at the top.

Mammoth Long Red. Flesh white, veined pink. Grows above the ground. Often yields 30 to 50 tons per acre.

Swiss Chard

Pkt. 5 cts., oz. 10 cts., 1/4 lb. 25 cts., lb. 80 cts.—postpaid

Fordhook Giant. Grows to an immense size. Large, fleshy, blue-green, much crinkled leaves of thick texture. Stems pearly white, often 2 1/2 ins. wide.

Lucullus. 60 days. In season from early spring to late autumn. Foliage may be used like spinach and the stems cooked like celery. The roots are not edible.

Cabbage

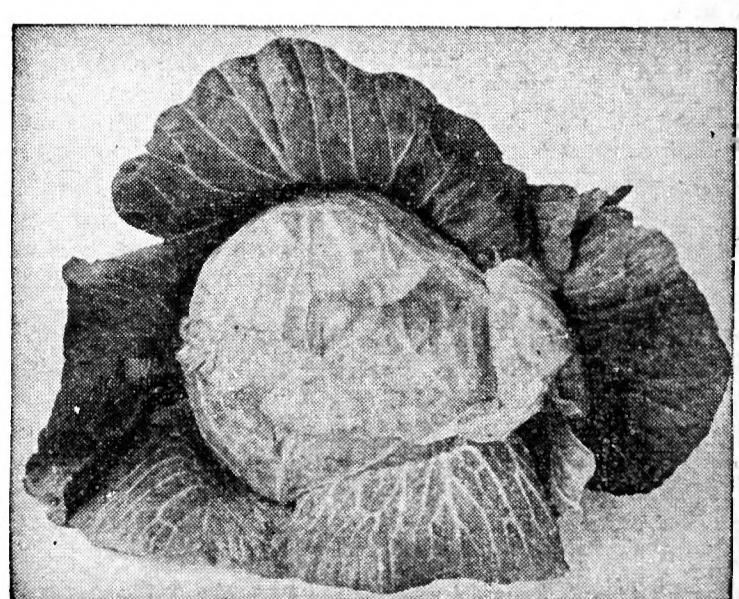

Transplant in rich soil: feed with a fertilizer rich in nitrogen. Frequent cultivation is essential. 1 oz. of seed will sow 100 ft. of drill.

All Cabbage seed sent postpaid

FIRST-EARLY VARIETIES

Early Jersey Wakefield. 64 days. Compact, pointed head. Can be planted closer than most varieties. Pkt. 5 cts., oz. 15 cts., 1/4 lb. 50 cts., lb. \$1.50.

Jersey Queen. 64 days. Identical with Jersey Wakefield, except it is **wilt-resistant**. Pkt. 5 cts., oz. 20 cts., 1/4 lb. 65 cts., lb. \$2.25.

Resistant Detroit

Golden Acre. 64 days. Heads round, about 9 ins. in diameter, firm, bright green in color. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 55 cts., lb. \$1.75.

Resistant Detroit. Identical with Golden Acre except yellow resistant. Pkg. 5 cts., oz. 30 cts., $\frac{1}{4}$ lb. 85 cts., lb. \$3.00.

Copenhagen Market. 68 days. Compact, round heads, averaging about 8 lbs. each. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 50 cts., lb. \$1.75.

Marian Market. Yellow Resistant Strain of Copenhagen Market. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 70 cts., lb. \$2.25.

Charleston Wakefield. 72 days. Seed selected from the best Early Jersey Wakefield, but heads will average about 50 per cent larger. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 45 cts., lb. \$1.50.

Early Dwarf Flat Dutch. 72 days. Heads flat, solid, and of good size. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 40 cts., lb. \$1.40.

LATER AND WINTER VARIETIES

Vo'ga. 89 days. Dependable main-crop variety for market garden and shipping. Plant dwarf, compact, with thick outer leaves; heads globular. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 45 cts., lb. \$1.50.

Wisconsin All-Season. 94 days. A yellow-resistant strain of All-Seasons. Head large, flat, and hard. Good winter keeper. Used extensively in manufacturing kraut. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

Savoy, Improved American. 95 days. Satisfactory for home use and market. Heads flattened globe-shaped, medium large and firm; short stems. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 45 cts., lb. \$1.50.

Surehead. 100 days. Large, solid, thick heads; good shipper. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 45 cts., lb. \$1.50.

Danish Ballhead. 105 days. Solid, round heads; short stems. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 50 cts., lb. \$1.60.

Houser. 105 days. Solid, slightly flattened head. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

Large Late Drumhead. 105 days. Very popular. Large, round head, slightly flattened. Excellent keeper. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 40 cts., lb. \$1.40.

Late Flat Dutch. 105 days. Large, flat head; very solid and keeps well. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 45 cts., lb. \$1.50.

Wisconsin Hollander No. 8. 105 days. A yellow-resistant strain of Hollander or Danish Ballhead. Yields well on yellow-infested land. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.25.

Mammoth Red Rock. 110 days. The largest of any of the red sorts. Heads solid and of excellent quality. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

CHINESE OR CELERY CABBAGE

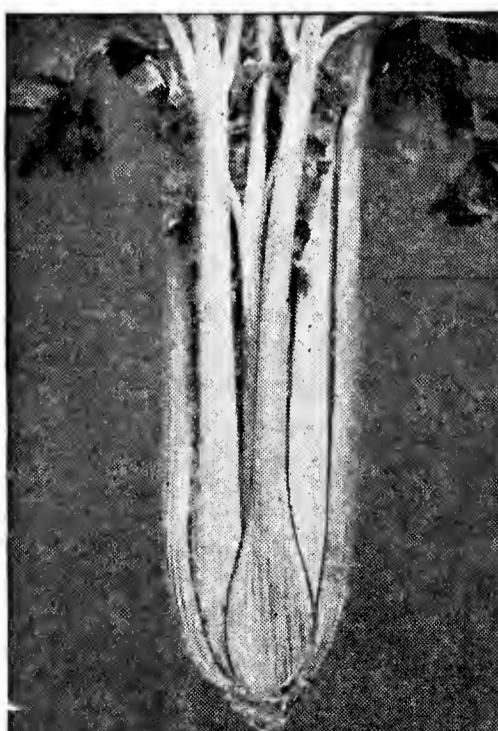

Improved Pekin or Chihli. Resembles celery and Cos lettuce, with tall, cylindrical heads. For early use, sow seeds in hotbed in February; for later use, sow early in June. Plants mature in from 12 to 15 weeks; will not stand frost. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 45 cts., lb. \$1.50—postpaid.

Carrots

Sow seed in early spring, in rows 15 ins. apart for garden culture, or 2½ ft. for field-culture. When plants are 2 ins. high, thin to 2 to 3 ins. apart. 8 ozs. seed will plant 300 ft. of row; 4 lbs. an acre.

Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 70 cts.—postpaid

Chantenay. 70 days. Roots 5 to 6 ins. long, deep orange-red, smooth, tapering. Desirable for home and market garden use.

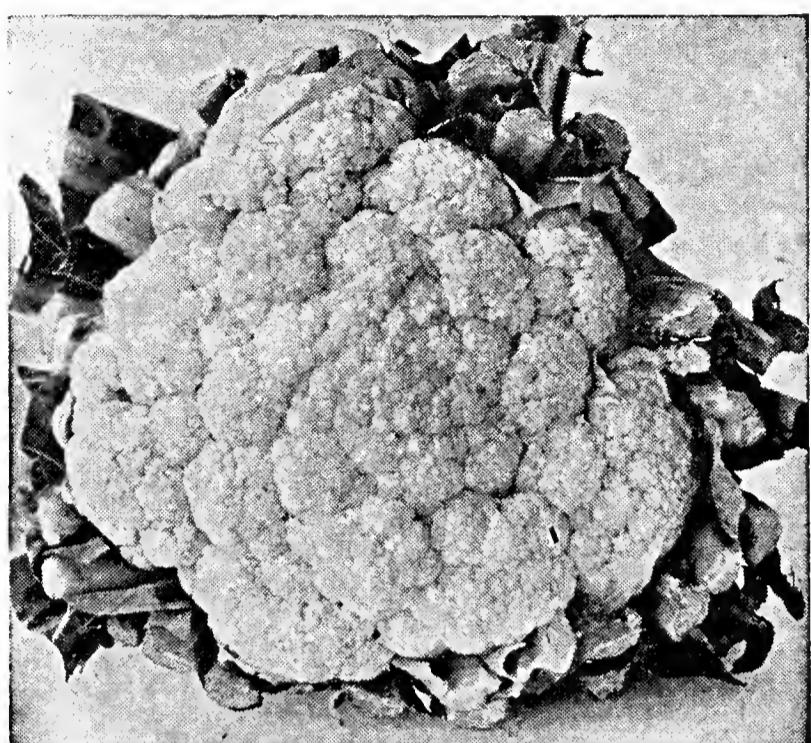

Fordhook Celery

Danvers Half-Long. 75 days. Roots longer than Chantenay, crisp, sweet and tender.

Early Scarlet Horn. 63 days. Roots 3 ins. long, reddish orange in color, about 1½ ins. thick at top.

Imperator. 76 days. A new variety. Rich orange flesh; root 7 to 8 inches long. Especially fine for bunching.

Cauliflower

Snowball Cauliflower

Early Snowball. Medium-sized, compact heads. Extra-good strain. Pkt. 5 cts., oz. \$1.15, $\frac{1}{4}$ lb. \$4.00—postpaid.

Celeriac

Turnip-rooted Celery. Grown for roots only. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 75 cts., lb. \$2.50—postpaid.

Celery

Sow seed in March and April; cover lightly and pack earth firmly. Use 1 oz. to 100 ft. of drill.

All Celery seed sent postpaid

Fordhook-Emporer. 130 days. Dark green foliage; thick stalks, solid and large; golden heart. Pkt. 5 cts., oz. 30 cts., $\frac{1}{4}$ lb. 80 cts., lb. \$3.00.

Giant Pascal. Excellent for fall and winter. Blanches to yellowish white; stalks solid and crisp. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 70 cts., lb. \$2.25.

Golden Self-blanching. A popular dwarf variety. Blanches easily and matures early. Fine for home gardens. Pkt. 5 cts., oz. 30 cts., $\frac{1}{4}$ lb. 85 cts., lb. \$3.00.

Winter Queen. Cream-white, stalks thick and heavy. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 75 cts., lb. \$2.25.

Wonderful (Golden Plume). Stalks short but hard, very large, golden yellow. Pkt. 5 cts., oz. 35 cts., $\frac{1}{4}$ lb. 85 cts., lb. \$3.

Collards

Georgia, Southern, or Creole. Plants grow 2 to 3 ft. tall. Green leaves and long stems. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts.,

Eggplant

Black Beauty. Glossy black fruit. Early and productive. Sow seed early in hotbed; set plants in open ground in late May. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 85 cts., lb. \$3.00—postpaid.

Endive

Sow seed in March for first crop; for second, sow in July. Blanch by tying leaves over the heart of plant.

Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. 90 cts.—postpaid

Broad-leaved Batavian (Escarolle). Broad, thick ribs.

Green Curled. Leaves crisp and tender.

White Curled. Ribs rose-tinted, white at heart.

Country Gentleman Corn Corn, Sweet or Sugar

Best to plant when ground is warm; soil should be rich and thoroughly worked before planting. Our Corn is Ohio-grown and is the best grade for this section. Western Corn, or local-grown seed Corn, is not suitable for this area.

We do not prepay postage on Seed Corn

Adams Extra Early. 70 days. Pure white grains on medium-sized ears. Lb. 15 cts., 2 lbs. 25 cts., 5 lbs. 60 cts., 10 lbs. \$1.10.

Adams Early. 75 days. Ears about 8 ins. long; white kernels. Lb. 15 cts., 2 lbs. 25 cts., 5 lbs. 60 cts., 10 lbs. \$1.10.

Black Mexican. 88 days. A superior Corn. The bluish black color of the kernels changes to white when cooked. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 70 cts., 10 lbs. \$1.25.

Country Gentleman. 93 days. Irregular rows of white kernels. A popular variety for home-gardens. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 65 cts., 10 lbs. \$1.20.

Cream Crowder. 45 days. Edible-podded. An early variety, also used as green Shell Peas and for drying. Lb. 15 cts., 2 lbs. 25 cts., 5 lbs. 50 cts., 10 lbs. 90 cts.

Dwarf Gray Sugar. 62 days. Edible-podded. Broad flat pods. Seed brown and wrinkled. Ht. 2 ft. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts., 10 lbs. \$1.50.

Early Alaska. 58 days. Round pods containing 5 to 8 tender Peas. Ht. 2½ to 3 ft. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 60 cts., 10 lbs. \$1.10.

Early Bird. 60 days. Pods deep green, rather broad, containing 8 or 9 large green Peas. Ht. 20 ins. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 75 cts., 10 lbs. \$1.30.

Laxton's Progress. 64 days. Vines 1½ ft. high, bearing heavy crops of large pods, holding from 8 to 10 Peas. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 75 cts., 10 lbs. \$1.80.

Little Marvel. 62 days. Vines 15 ins. high, bearing pods in pairs. Heavy producer. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 75 cts., 10 lbs. \$1.40.

Nott's Excelsior. 62 days. A popular medium-early wrinkled Pea of excellent quality. Ht. 14 ins. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 75 cts., 10 lbs. \$1.40.

Wyoming Wonder (Gilbo). 69 days. Wilt-resistant. Pods 5 ins. or more long, filled with Peas that are tender and sweet for a week or more after ripening. Ht. 2 ft. Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 80 cts., 10 lbs. \$1.50.

STICK VARIETIES

The vines are tall and need support.

Lb. 20 cts., 2 lbs. 35 cts., 5 lbs. 75 cts., 10 lbs. \$1.30.

Champion of England. 82 days. Long pods containing large, green wrinkled Peas. Ht. 4½ to 5 ft.

Gradus (Prosperity). 65 days. A secondary sort producing heavy crops if planted in rich soil. Ht. 3 ft.

Large White Marrowfat. 80 days. Pods about 3 ins. long, holding 5 or 6 Peas. The dry seed is creamy white, with a white eye. Ht. about 4 ft.

Telephone. 70 days. Long pods containing large, green, wrinkled Peas. Ht. 3½ to 4 ft.

Thomas Laxton. 62 days. Rapid-growing vine, reaching 3 ft. Pods long, well filled to the end with cream-colored, wrinkled Peas.

PEPPER

Chinese Giant Pepper

Sow seed in a hotbed in early spring, transplanting to open ground after all danger of frost is over.

All Pepper seed sent postpaid

California Wonder. 120 days. Very large, heavy, and of excellent quality. The meat is thick, of good flavor, not particu-

larly strong, and withstands shipping. Pkt. 5 cts., oz. 30 cts., ¼ lb. \$1.00, 1 lb. \$3.50.

Chinese Giant. 130 days. Small plant, bearing very large fruits. Popular because of its size and mild flavor. Pkt. 5 cts., oz. 35 cts., ¼ lb. \$1.15, 1 lb. \$4.00.

Long Red Cayenne. 120 days. Long, slender, pointed and twisted fruits, changing in color from deep green to bright red. Pkt. 5 cts., oz. 25 cts., ¼ lb. 70 cts., 1 lb. \$2.50.

Pimiento (Perfection). 130 days. Mild variety with thick flesh, which holds up for a long time. Pkt. 5 cts., oz. 15 cts., ¼ lb. 50 cts., 1 lb. \$1.75.

Ruby King. 110 days. Large fruit with sweet flavor and brilliant color. Pkt. 5 cts., oz. 20 cts., ¼ lb. 65 cts., 1 lb. \$2.25.

Sweet Mountain. 120 days. Plant grows upright. Large fruits, often 8 ins. long and 2 ins. thick. Pkt. 5 cts., oz. 20 cts., ¼ lb. 65 cts., 1 lb. \$2.25.

PUMPKIN

1 oz. seed will plant 25 to 30 hills spaced 10 ft. apart; 4 lbs., an acre.

All Pumpkin seed sent postpaid

Cushaw, Green-striped. 115 days. Creamy white skin marked with green. Flesh light yellow. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., 1 lb. 80 cts.

Cushaw, White. 112 days. Similar to the preceding but skin pure white. Fruit slightly smaller and with shorter neck. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., 1 lb. 80 cts.

Kentucky Field (Large Cheese). 108 days. Fruits round, slightly flattened, ribbed; skin creamy buff; flesh yellow, deep, of fine quality. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., 1 lb. 80 cts.

King of the Mammoths. 120 days. Often called "Jumbo" because of its size. Specimens may weigh 100 lbs. Excellent quality. Pkt. 5 cts., oz. 10 cts., ¼ lb. 30 cts., 1 lb. \$1.00.

Little Sugar (New England Pie). 115 days. Small, round; rich yellow flesh of excellent quality. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., 1 lb. 70 cts.

Tennessee Sweet Potato. 110 days. Bell-shaped fruit; white skin marked with green stripes; flesh creamy white. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., 1 lb. 70 cts.

Virginia Mammoth. 115 days. Very large, oval fruits that keep well. Thick flesh. Pkt. 5 cts., oz. 10 cts., ¼ lb. 35 cts., 1 lb. \$1.25.

RHUBARB

Sow seed in early spring, and transplant roots in the fall. Soil should be very rich.

New Pineapple. (Seed) Pkt. 5 cts., oz. 15 cts., ¼ lb. 40 cts., 1 lb. \$1.25—Postpaid.

New Pineapple. (Roots.) 15 cts. each, \$1.25 per doz.—Not postpaid.

RADISH

To be tender and crisp, Radishes must be grown quickly. Enrich the soil with thoroughly rotted manure—do not use fresh manure. May be grown to advantage under glass or violet-ray cloth. Sow seed from February to October.

Pkt. 5 cts., oz. 10 cts., ¼ lb. 20 cts., 1 lb. 60 cts.—postpaid

China Rose (Scarlet China Winter). 58 days. Half-long stump with deep rose skin and white flesh.

Crimson Giant. 25 days. Extra-large, globe-shaped Radish 1 to 1½ ins. thick; deep crimson.

French Breakfast. 25 days. Oblong form; scarlet with white tip; mild and tender.

Long Scarlet Short-Top. 35 days. Grows 7 to 8 ins. long; brilliant scarlet. One of the best.

Long White Icicle. 30 days. Roots 5 to 6 ins. long, pure white mild flavor.

Round Black Spanish. 60 days. Roots 2 to 3 ins. thick with black skin and pure white flesh.

Saxa. 22 days. Early forcing. Bright scarlet root with exceptionally small top. Highly recommended.

Saxa Radish

Sparkler. 24 days. Globe-shaped; upper portion carmine-scarlet, with pure white tip; solid, crisp, and sweet.

White Strasburg. 40 days. Long roots, often reaching 6 ins., and about 1½ ins. thick; smooth, pure white skin.

RUTABAGA

Improved American Purple-Top. 85 days. Large roots with yellow skin and purple tops; flesh pale yellow, fine-grained. Pkt. 5 cts., oz. 10 cts., ¼ lb. 20 cts., lb. 60 cts.—postpaid.

SALSIFY OR OYSTER PLANT

Salsify

Mammoth Sandwich Island. Roots 7 to 8 ins. long; flesh mild. Requires light, mellow soil; do not use fresh manure. Plants may remain out all winter. 2 ozs. seed will plant 100 ft. of drill. Pkt. 5 cts., oz. 15 cts., ¼ lb. 50 cts., \$1.75—postpaid.

SPINACH

Sow seed early in spring and make succeeding sowings every 10 days until late April. For fall crop, sow in August; for winter crop, in September or October. 1 oz. of seed will plant 100 ft. of drill; 10 to 12 lbs., an acre.

All Spinach seed sent postpaid

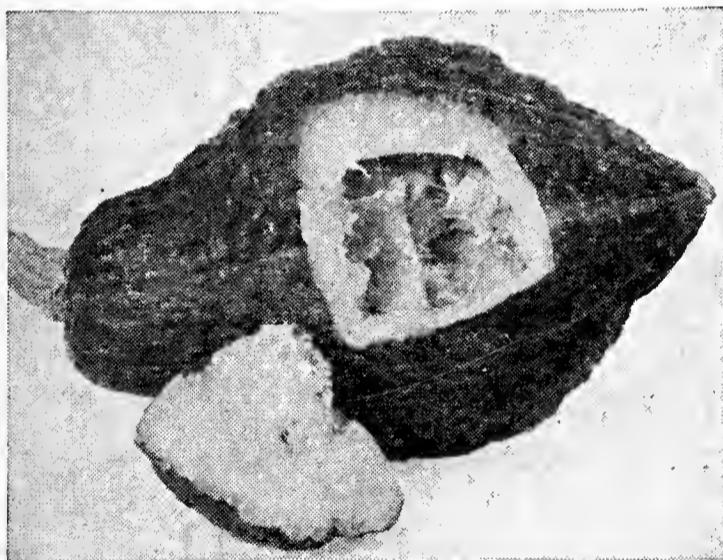

Bloomsdale Long-standing. 45 days. More heavily crumpled than the following. Excellent for late sowing to carry over winter. Pkt. 5 cts., oz. 10 cts., ¼ lb. 20 cts., lb. 40 cts.

Bloomsdale Reselected. 40 days. Growth up-right, with thick dark green, crumpled leaves. Pkt. 5 cts., oz. 10 cts., ¼ lb. 20 cts., lb. 40 cts.

Giant Nobel Thick-Leaf. 42 days. Heavy yielder of medium green thick, tender leaves. Pkt. 5 cts., oz. 10 cts., ¼ lb. 20 cts., lb. 40 cts.

Old Dominion. 40 days. Blight-resistant. Large dark green, heavily crumpled leaves. Pkt. 5 cts., oz. 10 cts., ¼ lb. 20 cts., lb. 40 cts.

SWISS CHARD. See Table Beets.

Hubbard Squash

SQUASH

Sow seed in early spring, in hills about 4 ft. apart for bush varieties, and 6 to 8 ft. for the running sorts.

All Squash Seed sent postpaid

SUMMER SQUASH

Cocozelle Bush. 60 days. Deep green fruits, marked with yellow and green, often 14 ins. long, tender and sweet. Pkt. 5 cts., oz. 10 cts., ¼ lb. 30 cts., lb. 90 cts.

Early White Bush (Pattypan). 55 days. Fine dwarf sort producing many small white Squashes. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., lb. 80 cts.

Early Yellow Bush Scallop (Golden Cluster). 60 days. Fruit flat, scalloped, pale yellow. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., lb. 80 cts.

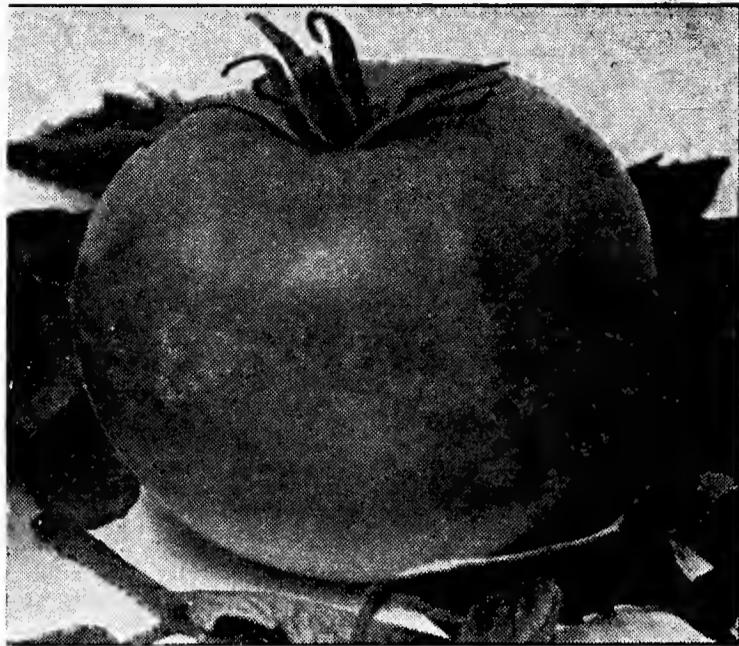

Fordhook. Delicious fruit 8 to 10 ins. long, with creamy white skin. Excellent when small or when fully grown. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., lb. 80 cts.

Golden Summer Crookneck. Fruit about 1 ft. long, bright yellow, with crooked neck. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., lb. 80 cts.

WINTER SQUASH

Banana. 110 days. Fruits often 2½ ft. long and 6 ins. across; shell gray-green; flesh yellow with small seed-cavity. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., lb. 75 cts.

Hubbard. Most popular Winter Squash. Fruits hard, with yellow flesh of rich quality. Pkt. 5 cts., oz. 10 cts., ¼ lb. 25 cts., lb. 90 cts.

Rutgers Tomato

Tomato

Sow seed in hotbed or flats in February or March; when plants make 4 leaves, transplant, and when danger of frost is over, set in the open ground. 1 oz. of seed should make 1500 plants.

All Tomato seed sent postpaid

Beefsteak. 90 days, wilt-resistant. A main-crop variety for home and market gardens. Fruit large, flat, smooth, bright scarlet. Pkt. 5 cts., oz. 35 cts., ¼ lb. \$1.00, lb. \$3.50.

Bonny Best, certified. 73 days. Standard early, Smooth, bright red fruits, ripening to the stem. Pkt. 5 cts., oz. 30 cts., ¼ lb. 80 cts., lb. \$2.75.

BREAK O'DAY. 70 days. Wilt-resistant. Early and extremely productive. Fruits large, smooth, globe-shaped, bright red. Desirable for both home and market garden. Pkt. 5 cts., oz. 35 cts., ¼ lb. \$1.10, lb. \$3.75.

Brimmer. 90 days. A large-fruited variety for home gardens. Uniform in size, flat, dark pink, coreless and solid, flavor very mild. Pkt. 5 cts., oz. 50 cts., ¼ lb. \$1.75, lb. \$6.25.

Early Detroit. 82 days. Fruit nearly globe-shaped, firm, purplish pink. Vigorous, productive vines. Pkt. 5 cts., oz. 35 cts., ¼ lb. \$1.10, lb. \$3.75.

FRENCH AMERICAN. 90 days. Our own introduction. Fruits especially fine for slicing. Mild in flavor, without acid; very solid, with few seeds; frequently weighs 2 to 3 lbs. each. Pkt. 10 cts., oz. 45 cts., ¼ lb. \$1.50, lb. \$5.50.

Greater Baltimore. (Cert. Ind. Strain.) 83 days. Wilt-resistant, A superb second-early and main-crop Tomato. Fruit red. Preferred by canners because of quality. Pkt. 5 cts., oz. 30 cts., ¼ lb. 80 cts., lb. \$2.75.

John Baer. 73 days. Bright red, smooth, evenripening fruit. Heavy yielder. Pkt. 5 cts., oz. 25 cts., ¼ lb. 70 cts., lb. \$2.50

June Pink. 60 days. The earliest pink variety and in demand on many markets. Pkt. 5 cts., oz. 30 cts., ¼ lb. \$1.00, lb. \$3.50.

Marglobe. 77 days. Wilt-resistant. A second-early sort with large, smooth, solid red fruits, ripening uniformly. Excellent for canning purposes. Pkt. 5 cts., oz. 20 cts., ¼ lb. 60 cts., lb. \$2.00.

Marglobe Certified. 77 days. Pkt. 5 cts., oz. 25 cts., ¼ lb. 85 cts., lb. \$3.00.

New Stone. 86 days. Standard main crop sort. Fruits oval, solid and smooth. Pkt. 5 cts., oz. 20 cts., ¼ lb. 60 cts., lb. \$2.00

Oxheart. 90 days. Fruits often weigh 3 lbs. Skin pink; flesh firm, sweet, and almost seedless. Pkt. 5 cts., oz. 55 cts., ¼ lb. \$1.75, lb. \$6.50.

Ponderosa. 88 days. One of the largest Tomatoes. Fruit solid, finely smooth, and of good quality. Desirable for home use. Pkt. 5 cts., oz. 35 cts., ¼ oz. \$1.35, lb. \$5.00.

Pritchard or Scarlet Topper. 73 days. A recent introduction. Fruit large, smooth, almost round, and carries the bright scarlet color clear to the stem end; flesh deep red, with few seeds and no core. Pkt. 5 cts., oz. 30 cts., ¼ lb. 90 cts., lb. \$3.35.

Rutgers, Certified. 73 days. Like Marglobe in shape, ripens from inside out, small seed cavity, few seeds. Good cropper, excellent for home gardens and canning. Oz. 25 cts., 4 ozs. 85 cts., lb. \$3.00.

Sparks Earliana. 66 days. The original variety, and a great favorite with all growers. Fruit rich scarlet-red, solid, and of good quality. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 80 cts., lb. \$2.75.

Yellow Cherry. Fruit round, smooth, and about the size of a cherry. Pkt. 5 cts., oz. 40 cts., $\frac{1}{4}$ lb. \$1.35, lb. \$4.50.

Yellow Ponderosa. Fruits in clusters of 3 to 5, large, somewhat flattened; skin and flesh yellow. Pkt. 5 cts., oz. 40 cts., $\frac{1}{4}$ lb. \$1.35, lb. \$5.00.

Turnip

Sow seed early in spring, as success depends on getting an early start. For winter use, sow in mid-summer or early autumn. 4 ozs. of seed will sow 300 ft. of drill; 3 lbs., an acre.

Pkt. 5 cts., oz. 5 cts., $\frac{1}{4}$ lb. 15 cts., lb. 40 cts.—postpaid

Cowhorn or Long White. 65 days. Carrot-shaped, pure white root growing nearly half out of the ground.

Large Yellow (Turner Globe). 75 days. Flesh yellow, firm, sweet.

Purple-top Strap-leaved. 45 days. Top dark red or purple; lower portion white; flesh tender and sweetly flavored.

Purple-top White Globe. 55 days. Flesh firm, sweet, fine-grained; globe-shaped, solid, and keeps well.

Seven-Top. 45 days. The tops are used for greens; very popular.

Shogoin. 45 days. A Japanese variety; tops similar to mustard

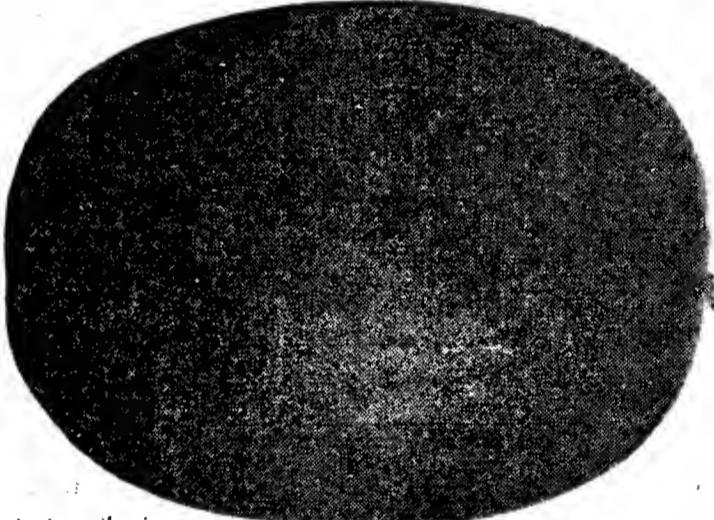

used principally for greens.

White Milano. 40 days. Medium-sized roots with smooth skin and white flesh.

Tobacco Seed

Big Oronoka. Pkt. 5 cts., oz. 40 cts., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00—postpaid.

Watermelons

Dixie Queen Watermelon

Sow seed after warm weather has arrived, in hills 8 ft. apart each way; fertilize heavily.

Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 65 cts., unless otherwise noted

All Watermelon seed sent postpaid

Tom Watson. 92 days. An improved Tom Watson. Melons 1½ to 2 ft. long, 10 ins. in diameter; flavor delicious. Average weight, 35 lbs.

DIXIE QUEEN. 85 days. A new variety. Skin dark green; flesh bright red, finely flavored. Fruits frequently weigh 50 lbs.; uniform in size and quality. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.00.

Florida Favorite. 87 days. Fruit long with dark green, mottled skin.

Gray Monarch (Long Light Icing). 90 days. Skin light green, mottled white; flesh of excellent quality.

Halbert Honey. 87 days. Skin dark green; flesh bright scarlet. A superb variety.

Improved Kleckley Sweets No. 6. 88 days. Wilt-resistant. An improvement in the older variety because of its resistance to fusarium wilt. Rich red flesh and white seeds. Quality and flavor equal to any other melon. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. 90 cts.

Jackson. 88 days. Melon of medium size, long, with mottled green skin; flesh red, sweet and crisp, ripens close to the rind. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 80 cts.

Kleckley Sweets (Monte Cristo). Popular for nearby markets. Fruits medium size, dark green, with thick rind and bright scarlet flesh that is solid, crisp, and sugary.

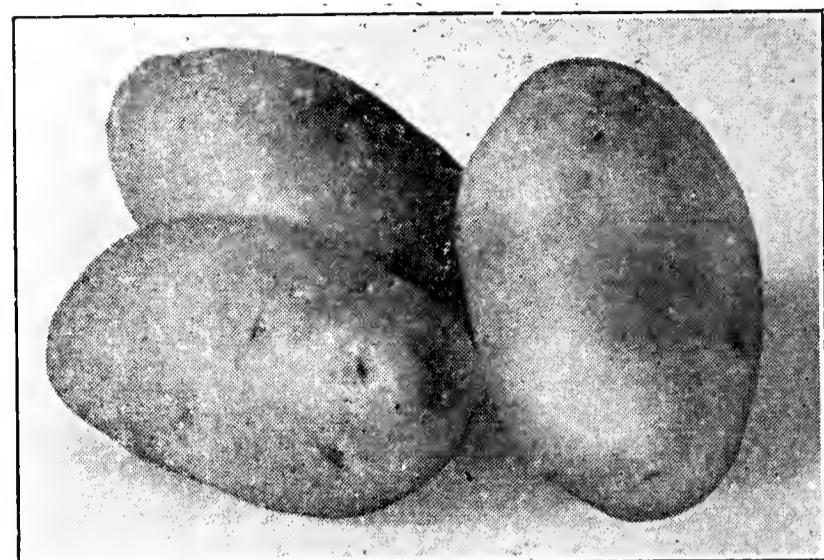

Peerless or Icecream. 85 days. Best for home gardens. Fruit finely netted; tender flesh.

Round Light Green-Rind Icing. 90 days. A family garden variety. Flesh scarlet, of good flavor, with comparatively few seeds.

Round Dark Green-Rind Icing. 90 days. Similar to the preceding except in color of rind.

Stone Mountain. 85 days. One of the most popular melons for general use. Broad-oval melons with blunt ends; skin dark green, with light green veining; rind thick; flesh bright crimson, sweet and crisp.

Stone Mountain Improved No. 5. 85 days. Wilt-resistant. Developed from Stone Mountain and has proved to be resistant to fusarium wilt. Resembles its parent in every respect excepting that it is smaller. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 40 cts., lb. \$1.30.

Spaulding Rose Potatoes

Maine-Grown Seed Potatoes

What "Certified" Means to Potato Growers

The value of Aroostook-grown Seed Potatoes is unquestionable. The Certification Department of the State of Maine plans to safeguard the interests of the seed-buyers. Two field inspections are made during the growing season and one at digging-time. While each carload is being graded an inspector visits several times. The maximum size for certified seed has been changed from 14 to 12 ounces. The Department believes that this size will more nearly meet your requirements.

Irish Cobbler. Select Maine-grown Cobblers, grown from first-class seed stock. For many years this has been a popular variety. Vines vigorous, producing a good crop of white Potatoes. Irish Cobbler is considered the standard Potato for all markets.

Red Bliss or Bliss Triumph. Produces mature Potatoes for table use at the earliest possible date. Sometimes called the "Six-weeks Potato."

Spaulding Rose. Medium early. Skin pale pink; flesh pure white. Good yielder.

Green Mountain. Makes big crops everywhere on almost any soil. Potatoes oval, smooth, white-skinned, and run uniformly large in size.

No. 2 Potatoes from Certified Seed. We will supply Maine-grown No. 2 Potatoes from Certified Seed for a little lower price than the Certified or Select Stock. The Seed Potatoes are smaller, but will cut to better advantage and are more economical for planting. Highly recommended for second planting in June and July. Our Potatoes are kept in cold storage and are just as solid and firm in July as in March.

Katahdin. This new Potato, introduced by the Maine Experimental Station, promises to be an outstanding variety. Matures about midway between the Cobbler and Green Mountain. Round in shape, eyes very shallow. Very heavy yielder. Clarence Sandburg, of Colorado, has reported a yield of 742 bushels per acre of the Katahdins on his 1937 crop. Our stock is Maine-grown from seed that was supplied by the Maine Experimental Station.

The Potato market is too unsettled to quote prices.

Spray Your Potato Vines

Whether you grow for market or for home use, the vines must be sprayed if you intend to harvest a good crop.

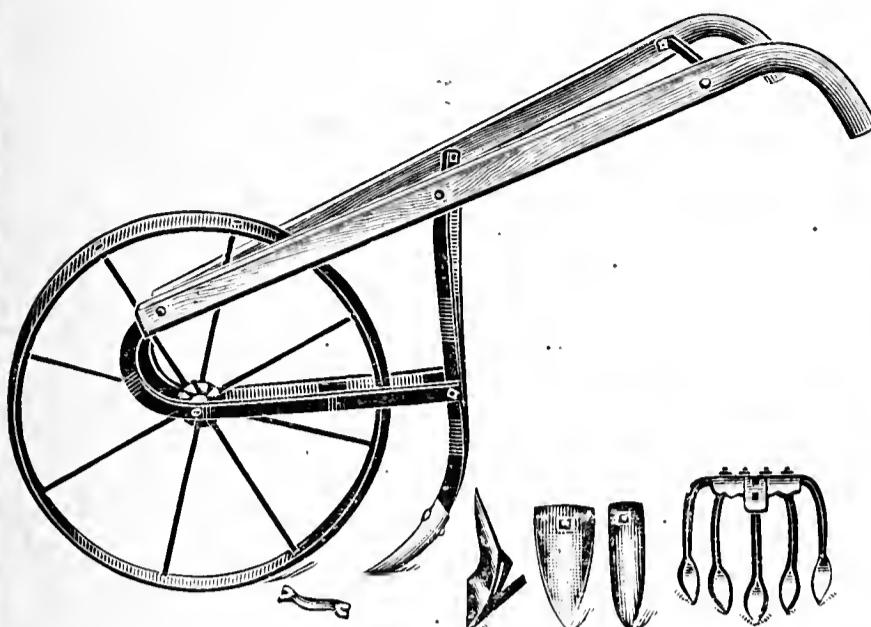

S. W. Potato Spray. The recognized fungicide and insecticide.

Prevents diseases and stimulates the plants.

Arsenate of Lead and Paris Green. Use to kill leaf-eating insects.

Semesan Bel. Prevents disease in Potatoes and increases the yield.

Spray materials are described on page 22 and sprayers on page 24.

Giant Imperial. Colors include light and dark blue, carmine, pink, white. Fine mixture, pkt. 5 cts. $\frac{1}{4}$ oz. 30 cts.

Tall Double-flowering Varieties, Mixed. Pkt. 5 cts., $\frac{1}{2}$ oz. 25 cts.

MARIGOLDS

Among our most popular annuals, giving great quantities of bloom from midsummer until late autumn.

Double African. Tall varieties. Mixed colors, pkt. 5 cts. oz. 60c.

Dwarf French. Double. Mixed colors, pkt. 5 cts. $\frac{1}{2}$ oz. 40 cts.

Dwarf French, Monarch Strain. Double. Mixed colors, pkt. 5 cts. $\frac{1}{2}$ oz. 40 cts.

Guinea Gold. Brilliant golden orange, semi-double and double blooms on plants from 2 to 2 $\frac{1}{2}$ ft. high. Pkt. 5 cts., $\frac{1}{2}$ oz. 45 cts.

Little Giant. New. Plants low growing and compact. Mixed colors, pkt. 5 cts., $\frac{1}{2}$ oz. 80 cts.

Yellow Supreme. Rich pure yellow blooms 3 ins. across, sweetly fragrant. Pkt. 5 cts., $\frac{1}{4}$ oz. 35 cts.

MEXICAN FIRE-BUSH (*Kochia, Summer Cypress*). Tall bushy plants with brilliant red foliage in autumn. Pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.

MIGNONETTE (*Reseda*). Special mixture, including white, red, yellow, pkt. 5 cts., $\frac{1}{2}$ oz. 40 cts.

MOURNING BRIDE (*Scabiosa*). Large-flowering mixtures. Pkt. 5 cts., $\frac{1}{2}$ oz. 50 cts.

NASTURTIUMS

One of the most popular annuals for bedding and for cutting. Plants thrive and bloom freely in poor soils.

Gem Mixture. Sweet-scented, dwarf, double hybrids. Pkt. 5 cts. oz. 25 cts.

Glorious Gleam Hybrids. All colors in mixture, pkt. 5 cts., oz. 20 cts.

Golden Gleam. First of the popular Gleam Hybrids. Intense golden yellow. Pkt. 5 cts., oz. 20 cts.

Scarlet Gleam. Dazzling scarlet, shining like fire. Pkt. 5 cts., oz. 20 cts.

Dwarf, Single Varieties, Mixed. Pkt. 5 cts., oz. 20 cts.

Tall, Single Varieties Mixed. Pkt. 5 cts., oz. 20 cts.

NIGELLA (Love-in-a-Mist). Blue and white, mixed, pkt. 5 cts. $\frac{1}{2}$ oz. 25 cts.

PAINTED DAISY (*Chrysanthemum carinatum*). Showy colors in mixture, pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.

PANSY, Oregon Giants. Large-flowering varieties. Mixed colors, pkt. 10 cts., 1-16oz. 35 cts.

Swiss Giants (*Roggli Hybrids*). Extra-fine colors—purple, blue, yellow, red, and mottled. Mixed colors, pkt. 10 cts., 1-16oz. 40 cts.

PETUNIAS

Among the most popular annuals for bedding because of their long blooming period. Our collection gives a wide variety, from which you may choose both colors and types.

Balcony. Free-flowering type. White, Rose, Blue. Mixed colors, pkt. 5 cts., 1-16oz. 30 cts.

Giants of California. Blooms in a variety of lovely shades, with pronounced yellow throats. Mixed colors, pkt. 20 cts., 1-16oz. \$2.50.

Heavenly Blue. Silvery blue. Pkt. 5 cts., 1-16oz. 35 cts.

Martha Washington. An All-America winner. Blooms 3 ins. across bluish-pink with red veinings. Pkt. 20 cts.

Nana Compacta. Dwarf bedding Petunia. Mixed colors, pkt. 5 cts. 1-16oz. 30 cts.

Rose Gem. Deep rich rose. Free-flowering, compact plants. Pkt. 10 cts., 1-16oz. \$1.35.

Rosy Morn. Flowers rose color, with a white throat. Pkt. 5 cts., $\frac{1}{8}$ oz. 50 cts.

Ruffled Monsters. Petals are fringed and fluted. Come in a wide range of colors. Mixed colors, pkt. 25 cts., 1-16oz. \$4.00.

Hybrid Varieties in Wide Mixture. Pkt. 5 cts., $\frac{1}{8}$ oz. 25 cts.

PHLOX, Large-flowering Annual Varieties, Mixed. Choice colors pkt. 5 cts., $\frac{1}{4}$ oz. 35 cts.

POPPY (*Papaver*), Carnation-flowering. Tall, double varieties Mixed colors, pkt. 5 cts., oz. 40 cts.

Shirley. Single. Mixed colors, pkt. 5 cts., oz. 40 cts.

PORTULACA (Sun Plant). Large single flowers in many bright colors. Mixed, pkt. 5 cts., $\frac{1}{4}$ oz. 35 cts.

SALPIGLOSSIS (Painted Tongue). Blooms veined and striped with gold, rose, scarlet, white. Mixed colors, pkt. 5 cts., $\frac{1}{4}$ oz. 30 cts.

SALVIA (Flowering Sage). Blue. Pkt. 5 cts., $\frac{1}{4}$ oz. 80 cts.
 Scarlet. Pkt. 5 cts., $\frac{1}{4}$ oz. 60 cts.
SNOW-ON-THE-MOUNTAIN (Euphorbia). Green foliage with stripes of white. Pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.
STOCK. Large-flowering Ten Weeks. Dwarf. Mixed colors, pkt. 5 cts., $\frac{1}{4}$ oz. 60 cts.
VENIDIUM fastuosum. Flower golden orange with brown center, resembling a daisy. Pkt. 10 cts., $\frac{1}{8}$ oz. 90 cts.
VERBENA, Large-flowering Hybrids, Mixed. Pkt. 5 cts., $\frac{1}{4}$ oz. 60 cts.

SWEET PEAS

Few of our climbing plants supply as much beauty and color in early summer as do the Sweet Peas. They should be given plenty of water during the growing and blooming season.

Early Spencer. An extra-choice mixture of the newest and brightest colors. Pkt. 5 cts., oz. 20 cts., 2 ozs. 35 cts., 4 ozs. 60 cts.

Early Spencer. A good mixture of this popular class. Pkt. 5 cts., oz. 15 cts., 2 ozs. 25 cts., 4 ozs. 40 cts.

Late-flowering Spencer. Blooms have the same form and color range as the other Spencer type, but are selected for later blooming. Pkt. 5 cts., oz. 15 cts., 2 ozs. 25 cts., 4 ozs. 40 cts.

ZINNIAS

The newer types of Zinnias are probably the most showy and satisfactory summer-blooming plants. They should begin to flower in early July and furnish bloom until plants are killed by frost. Zinnias may be called the "flower indispensable."

California Giants, Mixed. A strain of the extra-large Giants and the Dahlia-flowered sorts in a wide range of showy colors. Pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.

Crown of Gold Mixture. Flowers double, extra large, very showy borne freely on strong plants. Pkt. 10 cts., $\frac{1}{4}$ oz. 50 cts.

Dahlia-flowered, Mixed. Blooms from 4 to 6 ins. across, in showy colors. Very fine. Pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.

Fantasy. Golden yellow with shaggy petals. Extra fine. Pkt. 10 cts., $\frac{1}{4}$ oz. 45 cts.

Mexican Hybrids, Mixed. Small-flowered varieties in many bright colors. Pkt. 5 cts., $\frac{1}{4}$ oz. 50 cts.

Pompon or Baby, Mixed. Small plants excellent for bedding. Tiny bright-colored blooms on long stems, useful for cutting. Pkt. 5 cts., $\frac{1}{2}$ oz. 50 cts.

Scabious-flowered, Mixed. A new strain including orange, dull red carmine, and other shades. Pkt. 5 cts., $\frac{1}{4}$ oz. 45 cts.

Tom Thumb, Mixed. Plants 4 to 6 ins. high. Showy little blooms Pkt. 5 cts., $\frac{1}{2}$ oz. 75 cts.

Dwarf Varieties, Mixed. Very attractive bright little blooms. Pkt. 5 cts., $\frac{1}{4}$ oz. 20 cts.

SELECT PERENNIAL FLOWERS

Most hardy perennials grow readily from seed sown in the open ground. Seedlings should be transplanted after forming three or four leaves.

AGROSTEMMA coronaria. Bright crimson flowers and silvery foliage. Pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.

ALYSSUM, Gold Dust. Yellow flowers in May. Pkt. 5 cts., $\frac{1}{4}$ oz. 35 cts.

ANEMONE (Windflower), St. Brigid. Double. Mixed colors, pkt. 5 cts., $\frac{1}{8}$ oz. 50 cts.

ARABIS alpina (Rock-Cress). White flowers in April and May. Pkt. 5 cts., $\frac{1}{4}$ oz. 20 cts.

ARMERIA Formosa, Large Fl. Hybrids. Pkt. 10 cts., 1-16oz. 60 cts.

CANDYTUFT, Queen of Italy. Rosy lilac. Pkt. 5 cts., $\frac{1}{4}$ oz. 30 cts.

CANTERBURY BILLS (Cup-an-Saucer), Mixed Finest colors Pkt. 5 cts., $\frac{1}{4}$ oz. 45 cts.

Single Varieties, Mixed. Pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.

CHRYSANTHEMUM Mawi. Pink flowers and silvery foliage. Adapted to rock-gardens. Pkt. 10 cts., $\frac{1}{8}$ oz. \$1.00.

COLUMBINE, Mrs. Scott Elliott's Longspurred Mixture. Pkt. 10 cts., $\frac{1}{8}$ oz. 90 cts.

Rocky Mountain. Violet-blue and white. Pkt. 5 cts. $\frac{1}{8}$ oz. 60c.

Improved Varieties, Mixed. Pkt. 5 cts., $\frac{1}{4}$ oz. 80 cts.

COREOPSIS grandiflora lanceolata. Yellow; single. Pkt. 5 cts., $\frac{1}{2}$ oz. 25 cts.

ENGLISH DAISY, Double, Mixed. Pkt. 10 cts., $\frac{1}{8}$ oz. 50 cts.

DELPHINIUM, Blackmore & Langdon's Strain. Mixed colors, pkt. 15 cts., 1-16oz. 80 cts.

Mixed Hybrids. Pkt. 10 cts., $\frac{1}{8}$ oz. \$1.00.

FOXGLOVE (Digitalis). Mixed colors, pkt. 5 cts., $\frac{1}{8}$ oz. 15 cts.

GAILLARDIA grandiflora. Shades of red and bronze. Pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.

GEUM, Lady Stratheden. Golden yellow. Pkt. 10 cts., $\frac{1}{8}$ oz. 60 cts.

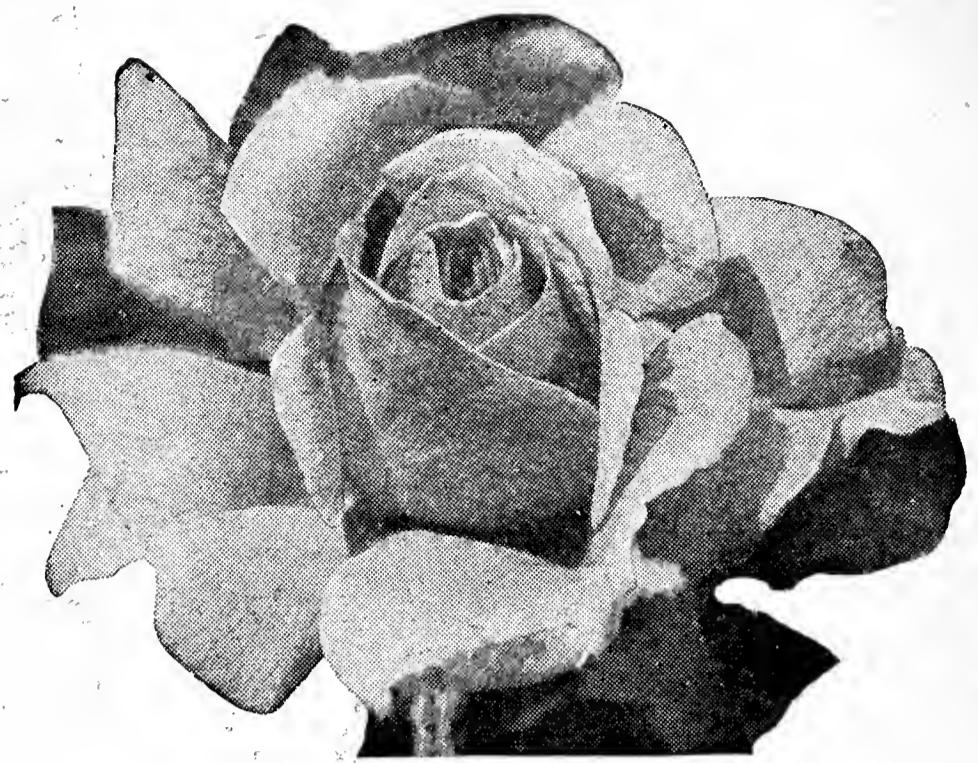

Mrs. Bradshaw. Brilliant scarlet. Pkt. 5 cts., $\frac{1}{8}$ oz. 50 cts.

GYPSOPHILA paniculata fl.-pl. Double; white. Pkt. 5 cts., $\frac{1}{8}$ oz. 75 cts.

HEUCHERA (Coral Bells). Bright rose and crimson. Pkt. 10 cts., $\frac{1}{8}$ oz. \$1.25.

HOLLYHOCK, Double Varieties, Mixed. Pkt. 5 cts., $\frac{1}{8}$ oz. 75 cts.

Single Varieties, Mixed. Pkt. 5 cts., $\frac{1}{4}$ oz. 15 cts.

Miss America

LUPINES, Mixed. Blue, Pink, and white. Pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.

PHLOX decussata. Choice mixed colors, pkt. 5 cts., $\frac{1}{8}$ oz. 80 cts.

POPPY, Oriental (papaver orientalis) Mixed. Pkt. 5 cts. $\frac{1}{8}$ oz. 30 cts.

PYRETHRUM (Feverfew). Single and double varieties in mixed colors, pkt. 5 cts., $\frac{1}{8}$ oz. 60 cts.

SHASTA Daisy, Conqueror. Pure white. Pkt. 15 cts., $\frac{1}{4}$ oz. 50 cts.

SNAPDRAGON, University of California Mixture. Rustproof. Many colors. Pkt. 5 cts., $\frac{1}{8}$ oz. 20 cts.

Dwarf Types, Rustproof. Large flowers. Mixed colors, pkt. 5 cts., $\frac{1}{8}$ oz. 15 cts.

WALLFLOWER. Finest varieties in mixed colors, pkt. 5 cts., $\frac{1}{4}$ oz. 25 cts.

ROSES

For the convenience of our Rose-loving friends, we shall carry a select list of varieties. These Rose plants are produced by the best growers in America. In addition to the varieties listed, we are in position to furnish promptly any Rose variety in commerce.

Fertil-Potted Plants

Small gardeners will find this the ideal method of Rose-growing. The plants are field-grown, then lifted, potted, and allowed to make a good root-growth. Plants are sure to be alive and are guaranteed to bloom the first year. Fertil-Potted Rose plants will be ready at our store after March 15.

We do not pay transportation charges on Fertil-Potted Roses.

Blaze. Plant Pat. 10. Intense scarlet climbing Rose. \$1.10 each.

Countess Vandel. Plant Pat. 38. Coppery bronze and gold \$1.10 each.

Wetzel's Lawn Grass Seed

Makes Beautiful Home Grounds

How to Seed and When.—Lawn Grass can be sown either spring or fall. Spring sowing should be done in March or April and fall sowing in September or October. One pound of seed will sow 300 to 400 square feet. If you have lawn problems, bring them to us.

Green Island Lawn Grass Seed. Best mixture containing the finest grasses for Virginia growing conditions. Lb. 30 cts., 5 lbs. \$1.25, 10 lbs. \$2.30, 25 lbs. \$5.50.

Shady Lawn Grass Seed. Special mixture for use under trees and heavily shaded locations. Lb. 45 cts., 5 lbs. \$2.10, 10 bus. \$4.00, 25 lbs. \$9.50.

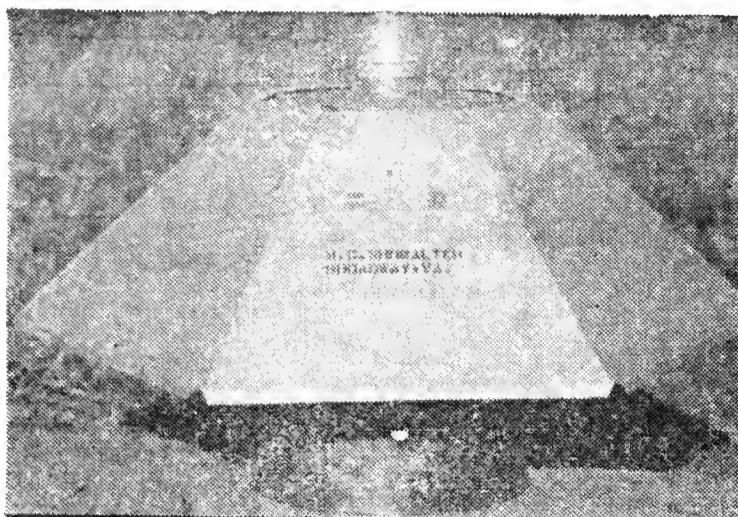

Park Lawn Grass Seed. Our popular low-priced mixture. Suitable for Shenandoah Valley conditions. Lb. 25 cts., 5 lbs. \$1.10, 10 lbs. \$2., 25 lbs. \$4.75.

Kentucky Blue Grass. Lb. 20 cts., 5 lbs. 90 cts.

If ordering Grass Seed by mail, add 10 cts. for first pound and 1 ct. extra for each additional pound

**Wetzel Seeds Are
DEPENDABLE**

Necessary Supplies for Poultrymen

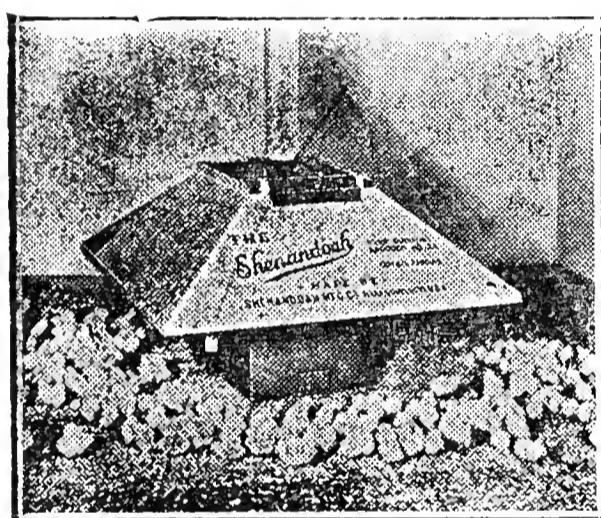

SHOWALTER BROODER
Wood-Burning

Cast-iron grate (not found in other wood brooders), supported by four legs resting on bottom of stove. Ashes are removed from bottom of stove through ash-door. Even draft over entire grate prevents waste of fuel.

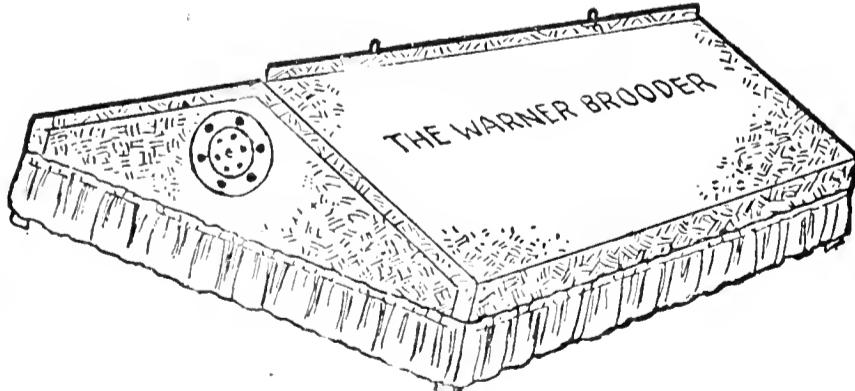

Body of stove is 22-gauge sheet-iron; bottom double seamed to body; top is cast-iron, bolted to body. Linning is 20-gauge sheet-iron; fuel-door has cold handle, is double-hinged, and self-sealing. A 4-in. Wafer thermostat, controlling draft, is regulated by thumb screw and is very sensitive.

Stove fitted with 5-ft.-in. 6-piece hover, large enough for 500 to 700 chicks. \$21.00.

SHENANDOAH BROODER

Wood-burning; reliable, economical, clean, safe, easily cared for. No. 24, 500-chick size, \$24.75; No. 20, 300-chick size \$22.25.

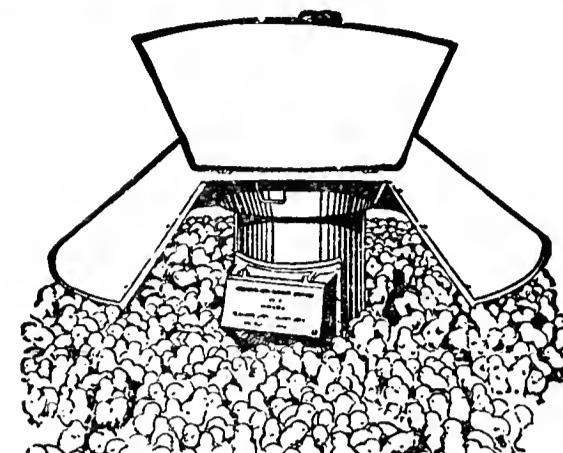

WARNER ELECTRIC BROODER

The Electric Brooder with a THREE Year Guarantee

Carefully made, rigid, durable, easily assembled. Properly ventilated. "Floor Always Dry." Fabric curtain admits air, but excludes drafts. Enclosed switch-box avoids fire hazards. Economical operation—as low as 6 cents a day. Allows 7 sq. in. or more for each chick.

No. 500. Size 48 x 72 ins. Chick capacity, 500. Wattage 1000. Shipping weight, 115 lbs. \$32.50.

No. 350. Size 48 x 50 ins. Actual chick capacity 350. Wattage 800. Shipping weight 85 lbs. \$23.00.

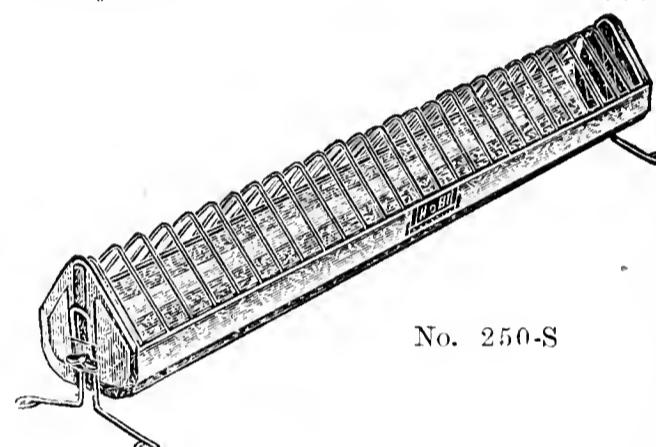

NEWTOWN BROODER

The Newtown combustion chamber burns all the gases from the coal. Even when the magazine is full of coal, there is ample room for mixing of air, fuel, and gases. This saves coal. Newtown does not get clogged or go out and let your chicks get chilled.

No. 11. 500-chick capacity. \$25.00.
